Sino-Austronesian, version I
(Sagart 193, 1994)
1. Blust's higher AN subgrouping
2. Austronesian reconstructions by Dempwolff and Blust. MP material deemed essential.
3. only Chinese and Austronesian related
4. sound correspondences between final syllable of AN words and Chinese mono-syllables.
5. some morphology
6. criticisms: too little basic vocabulary; Tibeto-Burman outside the relationship.

Sino-Austronesian, version II

1. East Coast Linkage (ECL) is one primary branch of PAN; Malayo-Poynesian forms one clade within ECL.
2. all Austronesian reconstructions either include Formosan material or are based on Formosan exclusively. MP material not essential.
3. Tibeto-Burman is reintegrated: relationship is between Sino-Tibetan and Austronesian.
4. some modifications in the sound correspondences; in addition, initial consonant of "lost" penultimate syllable of AN words governs Chinese syllable type.
5. more morphology
6. more basic vocabulary
Higher AN subgrouping (adapted from Ho 1998)

Support for ECL: six innovations shared exclusively by PMP and Formosan East Coast languages

- PAN *C => *t (Siraya, Bunun, Amis, Kavalan, Basay-Trobiawan, PMP: Ferrell 1969)
- PAN *N => *n (Kanakanabu, Bunun, Amis, Kavalan, Basay-Trobiawan, PMP: Ho 1998)
- 'bird' PAN *ayam replaced by *manuk (Basay-Trobiawan, PMP)
- 'banana' PAN *belbel replaced by *pu(n)ti (Basay-Trobiawan, PMP: Li 1992:277)
- 'to count' PAN *supeR replaced by *bilang (Kavalan, Basay-Trobiawan, PMP: Li 1992:277)
- pang-V instrumental construction (Amis, PMP: Starosta 2001)

Some PAN and PECL reconstructions

body hair
PAN gumuN 'body hair'. Puyuma (Cauquelin 1991) gumul 'body hair, feather'; Saisiat (Ogawa and Asai 1935:6) komol 'pubic hair'. The analogy of PAN *kumis 'beard' may or may not have played a role in the reflexion of PAN *g- as k- in the Saisiat form (the Saisiat reflex of PAN g- is uncertain).

bone
PAN kukut 'bone'. Dempwolff reconstructed UA *kukut 'joint, articulation' based on corresponding forms in Javanese and Ngaju Dayak. Add Favorlang 'o’ot ‘bone’ (PAN *k goes to zero in Favorlang).

foot
PAN kakay 'foot'. Atayal kakai, Sediq qaqay, Thao kakai, all 'foot' (Ferrell 1969).
palm of hand
PAN dapa 'palm of the hand', consisting of Blust's PWMP (1980 # 112) Da(m)pa 'palm of the hand, sole of the foot' plus Atayal (Egerod 1980) rapa? 'palm of the hand'.

horn, antler
PAN (q)uRuŋ 'horn/antler': Pazeh ?uxúŋ; Sediq uruŋ (Ferrell 1969), oloŋ (Pecoraro 1977); Yami ?urúŋ, all 'horn' (Pazeh, Sediq and Yami forms cited from Ferrell 1969: 136); add Kanakanabu ta?uruŋu, Saaroa tauruŋu 'pygmy deer' (Tsuchida ms), both with prefixed ta- and final echo vowel; Long Nawang uheng, Uma Juman hueng 'horn, antler'.

Note: Blust (1973) reconstructed PAN *(q)uReng 'horn, antler', based on the Pazeh, Sediq and Yami forms above, plus reflexes in two WMP languages: Long Nawang uheng, Uma Juman hueng 'horn, antler'. I reconstruct /u/ in the final syllable because Formosan and Extra-Formosan languages belonging to three primary branches (Pazeh-Sediq; Kanakanabu-Saaroa; and Yami) agree on /u/. I assume the Long Nawang and Uma Juman forms exhibit a secondary (WMP) u > ə dissimilatory change; Blust's decision to reconstruct /e/ in the last syllable reflects the greater weight given Extra-Formosan languages in his practice.

Note: Dempwolff had reconstructed "Ur-Austronesisch" *suNu 'horn'. Tsuchida (1976:165) reconstructed another form in the same meaning: "Proto-South-Formosan" *seq₁uŋ, with reflexes in Saaroa, Saisiat and Paiwan. He regarded Dempwolff's *suNu as a metathesized form of his own *seq₁uŋ. Both *sequ₁uŋ and *(q)uRuŋ appear to have been PAn words; their referents must have been different, perhaps as 'horn' (hollow, permanent, non-branching) vs. 'antler' (solid, shed annually, branching).

chicken
PAN kuka 'chicken, fowl': Paiwan koka, Rukai (Taramakau) koka, Siraya kuka.

Note: several Formosan languages have prefixed elements ta-, tari-, taru-, toro-: Siraya takuka, tahuka, Rukai (Maga) torokuka, Kanakanavu tariku:ka, Saaroa torokooka, etc.

Note: Li (1992: 271; 1993:305) reconstructed "Proto-Formosan" *teRakuk, based on Bunun, Puyuma, Kavalan and Amis forms, and interpreting Tsou tro?ua, Kan tarikuka and Saaroa turukuuka as containing a suffixed formative -a of no particular function. The forms reflecting teRakuk, without final -a, are found exclusively in languages of the East coast, a well-known diffusion zone. It is more natural to suppose that a word for 'chicken' something like *teRakuk was reanalyzed as containing root -kuk 'sob, cackle', and was for that reason changed to Li's *teRakuk in a language of the East coast; and that the word then spread to other East coast languages. The alternative is to suppose that a suffixed -a of unknown nature was added to teRakuk independently in proto-Tsouic, in Taramakau Rukai, in Siraya and in Paiwan.

cave, hole
PAN b[e]luŋ 'cave, hole'. Paiwan beruŋ 'hole', Tsou (Tung) feóŋo 'cave, hole', Pazeh waruŋ 'cave, hole'.

3
cloud
PAN (root) -qem 'cloud': Amis toʔem 'clouds' (Fey 1986); Rukai (Budai) ṣəmə:ma 'cloud' (Tsuchida ms); Bunun lohom (Ogawa and Asai 1935), luhum (Nihira 1983) 'cloud'; this root also includes a WMP word *q-al-emqem reconstructed here on the basis of a cognate set first assembled by K. Wulff (1942, No 53): Sundanese halömhöm 'overcast', Ceb. ?alum?um 'for the sky to be overcast'.

to carry
PECL baba 'carry on back'. Dempwolff reconstructed baba 'to bring along' (incl. several items meaning 'to carry on back'). Add Amis fafa 'to carry on back' (child), Basai baba 'carry on back', Trobiawan uvava 'id.'.

to cut off, short
PAN [*putul 'short'. Dempwolff reconstructed *puTul 'break off, cut off'. Add Bunun ma-putul 'short' (ma- stative prefix), Seediq butul 'short' (Ferrell 1969:366; expect putul in Seediq).

to drown, disappear
PAN Nemes 'to drown, disappear'. Dempwolff reconstructed *lemes 'to drown, immerse'. Add Puyuma (Cauquelin 1991) lemes 'disappear, destroy, to end'.

to fall
PAN (root) -luR 'to fall'. Dempwolff reconstructed quluR 'drop slowly' (Tg 'fall'). Add Atayal (Egerod) tarui < taluR 'to fall down', with prefixed ta- 'agentless action'.

to follow
PECL d[u]NuR 'to follow'. Blust (1980 #109) reconstructed (3) duluR 'accompany, go together with'. Add Siraya dmyllough 'to follow' (Adelaar 1999:321), equivalent to d-m-ilux (with short i) in Adelaar's restored notation.

to put together
PECL puluŋ 'to gather', consisting of Dempwolff's puluŋ 'to gather', plus Ami polon 'all, all together' (Fey 1986; the examples include verbal uses as 'to gather, get together'.)

to speak, say
PAN kawaS1, kaw(a)kawaS1 'speak, say': Pazeh ka:kawas 'speak, say' (Ferrell 1969: 313), Basai makaukawas 'say', kawakawase 'story', Trobiawan kawas 'story'.

to sleep
PAN (root) -zem 'close the eyes, sleep'. Based on NW Formosan (ma)-qizem 'sleep' (Saisiat maʔerəm 'sleep', Pazeh ?idəm, ma-ʔidəm 'sleep': Ferrell 1968:90) plus WMP ke(zZ)em 'close the eyes' (Blust 1973) and WMP peZem 'close the eyes' (Blust 1973), dbl. of the preceding.

to ruin

broad
PAN (root) -baŋ 'broad', consisting of 'candidate root' -baŋ 'broad' (Blust 1988:73), based on 3 WMP items (probably including Dempwolf's baŋ 'broad, wide' and Blust's PWMP lak(e)baŋ 'broad, wide'), plus Atayal (Egerod) labaŋ 'broad', Sediq (Li 1981) ilabaŋ 'wide'.

**hot**
PECL qaïjet 'hot'. Dempwolf reconstructed qaet 'hot' (Dempwolf 1929); 'warm breath' (Dempwolf 1938). Add Siraya (Matthew Gospel) aingit 'fever' (Adelaar, p.c., 1999).

**old**
PAN (root) -daŋ. Dempwolf reconstructed guDaŋ 'adult, grown-up'. Add Puyuma iDaŋ 'old' (inferred from maranaiDaiDaŋ 'oldest, Huang 2000a: 49); Rukai maraDaŋ 'old' (Ferrell 1969).

**thick**

**loincloth**
PAN sabuk 'loincloth'. Dempwolf reconstructed sabuk 'loincloth'. Add Atayal (Egerod 1980) habuk 'loincloth'; Taroko (Pecoraro 1977) xabuk 'belt'. Cf also Paiwan ibuk 'man's upper garment', m-ibuk 'to wear' (Ferrell).

**to bury, tomb**
PAN (root) -buN 'to bury, cover with earth'. Blust (1988) reconstructed a root -bun 'heap, pile, cover with earth; collect, assemble', based on MP evidence, including Dempwolf's ta(m)buN 'heap of earth'. Add Atayal (Egerod) ?bul 'to bury; tomb'; Mayrinax g-un-bul 'to bury'. This Atayal evidence indicates that the root was -buN at PAN level, changing regularly to -bun in MP.

### Sino-Tibeto-Austronesian lexical comparisons

In italics: words in Swadesh's 100-words list; in bold caps: words in Yakhontov's 33-words list.

</table>
A prefix PAN Si- : OC s- : TB s- allows a verb stem to take into its argument structure a NP standing for a 'third' participant with situational roles such as causer, beneficiary, instrument, etc. The Austronesian Si-V construction is known as 'Instrument focus' but its semantics are considerably more complex. Huang (1991) characterizes the Si- construction in Atayal as 'circumstantial voice'. She notes (1991:45) that one characteristic of circumstantial voice is 'increased transitivity'. I cite here examples with a transitive/causative character, because the semantic difference between prefixed and non-prefixed forms can be apprehended directly through simple lexical glosses.

AN Si-Verb > 'transitive/causative'

Atayal ŋ美誉 'to be afraid': s-ŋ美誉 'to frighten'
Paiwan k/m/avuL 'beg': si-kavuL 'cause someone to beg'
Bunun ma-bahliv 'to buy': is-bahliv 'to sell'

Old Chinese s-Verb 'transitivizing'

TB s-Verb 'transitivizing'

Tibetan 'bar 'to burn, catch fire, be ignited': s-bar-pa 'to light, to kindle, to inflame'
Gyarong rong 'to see': s-rong 'to show'
Boro gi 'be afraid of, fear': si-gi 'frighten'
Proto-Loloish\(^1\) (C)-no2 'to awake': s-o-no2 'to awaken' (tr.)

**pV-Verb 'causative'

A verbal prefix **pV- making causatives out of noncausatives is widely attested in TB and in AN. It has not been observed in Chinese.

AN: pa-Verb 'causative'

Amis kaən 'eat': pa-kaən 'feed'
Puyuma kan 'to eat': pa-kan 'to feed'
Atayal biru 'to write': p-biru 'to let write'
Thao kan 'eat': pa-kan 'cause to eat, feed'

TB: *pV-Verb 'causative'

Jingpo: ran 'be separated': pə-ran 'to separate'
Boro: ɡonŋ 'to bend' (intr.): bo-khoŋ 'to make bent'

\(^1\) Bradley 1979
Mikir: thi 'to die': pe-thi 'to kill'
Angami Naga: vo 'to go': pe-vo 'to cause to go'
Tib.: zu 'to dissolve' (intr.), b-žu 'cause to dissolve'
Yi-Wuding: dźi11 'to dissolve': pe33-dźi11 'cause to dissolve'.
Gazhuo: kho53 'to become curved': py33-kho53 'to bend (trans.)'

**m- intransitive

AN m-/-um- + transitive verb > intransitive verb
The Austronesian 'Actor Focus' (AF) marker is a nasal affix m- (prefix) or -um- (infix) depending on root shape; in Starosta's ergative interpretation of AN grammar (Starosta 1991, 1994), all verbs in Actor Focus are intransitive, and the function of m-/um- is to derive intransitive verbs from transitive verbs. Constructions in which AF verbs (marked with m-/-um-) take both a patient and an agent are antipassive (pseudo-transitive): such sentences translate naturally into transitive sentences in accusative languages. For that reason, French or English translations fail to capture the intransitive character of verbs marked with m-/-um-. This intransitive character of AF verbs appears from the fact that their situational patient, if there is one, is encoded in an oblique case, genitive or locative.

TB m-Verb > intransitive
In Gyarong and Xide Yi, this prefix is a nasal which takes the place of articulation of the root initial. Examples (Lin Xiangrong 1993: 193 for Gyarong; Dai Qingxia 1998:86 for Xide Yi):

Gyarong
ka-tʃop ‘to set fire to’ : kə-ndʒop ‘to catch fire’
ke-p’ek ‘to split open’ : kə-mbēk ‘to be rent’
ke-tč’op ‘to break’ : kə-ndzıp ‘broken’
ke-kltk ‘to wipe off’ : kə-ngəlk ‘to fall’

Xide Yi
ti55 'to suspend' (tr.) : ndi55 'to be suspended' (intr.)
tu55 'to burn' (tr.) : ndu55 'to burn' (intr.)
p031 'to roll' (tr.) : mbo31 'to roll' (intr.)
tće55 'to pull off' (tr.) : ndzı55 'to fall off'
to33 'to give to drink' : ndo31 'to drink'

In these examples, the N- prefix has voiced a following voiceless stop. In many TB languages (such as Tibetan, Kiranti, Bahing, Vayu and Bodo-Garo), the nasal element has been lost and only voicing of the root initial remains. Preceding initials other than voiceless stops, however, the intransitive prefix maintains itself as m- (WT), ma- (Jingpo), mV- (Boro), and prefixed forms are easy to detect outside of minimal pairs. Examples (Wolfenden 1929:30 for WT and Jingpo, Bhattacharya 1977: 184, 328-330 for Boro):

WT
m-gu-ba 'to rejoice, be glad'
m-nar-ba 'to suffer, be tormented'
m-nam-ba 'to smell (intr.), stink'
m-nal-ba 'to sleep'
m-nab-ba 'to dress oneself'

2 Gyarong ka-, kə- and kə- are verb prefixes for controllable (ka-, kə-) and non-controllable (kə-) actions.
Kachin  ma-nam 'to smell' (intr.)
ma-den 'to grow, to expand'
ma-ni 'to laugh'

Boro  mō-nam₁ ‘to spread smell’
mō-zom₁ ‘close the fist’
mı₂,ni ‘to laugh’

The original form of the intransitive prefix was therefore m- or ma-, with a variant N- before voiceless stops.

Chinese N-transitive verb > intransitive verb
Like Tibetan and other TB languages, Middle Chinese (mid-first millennium CE) has some contrasting pairs of transitive verbs with voiceless stop initials and intransitive verbs with voiced stop initials:

MC  kjowk ‘to bend’ (tr.) : gjowk < *Nkh- ‘bent, curved; bend the body’
trjuwngH ‘to hit, place in the middle’ : drjuwngH < Ntr- ‘to be in the middle’

That the voiced embers of these pairs eralier had prenasalized initials is shown by Miao-Yao. Proto-Miao-Yao (Wang and Mao 1995) borrowed some of these forms from Late Old Chinese (before MC), with prenasalization and no voicing: *Nkhok ‘curved’, *Nθŋ ‘middle’.
Evidently Chinese had the same intransitive prefix N- as Gyarong and Xide Yi.

**pV-Noun > Verb

AN: pa-Noun > Verb
Atayal: suzit ‘a whistle’ : p-suzit ‘to whistle, blow an instrument’
Taroko: bais ‘husband, wife, mate’ : p-bais ‘to form a pair’
Amis  sual ‘words, speech’ : pa-sual ‘to tell, explain’
Paiwan  tutu ‘milk’ : pa-tutu ‘to feed milk’
Puyuma  tigami 'letter' : pa-tigami 'write a letter’
Thao  apuy 'fire' : p-apuy 'start a fire'

TB: pV-Noun > Verb
Burm.  rum ‘gathering place’ : p-rum ‘assemble, crowd together’
Tib.  zo ‘milk’ : b-žo-ba ‘to milk’
Mikir  chor ‘pair’ : pa-chor ‘to marry’ (trans.)

Chinese p-Noun > Verb
Perhaps, from Wuxiang 武鄉 a Jin dialect of Shanxi:
p-suv ‘to card, comb’

Where suv is etymology the same word as 梳 shu, MC srjo 'a comb'.

**Verb-en > 'thing Verb-ed/thing to be Verb-ed'

PAN Verb-en > 'thing Verb-ed/thing to be Verb-ed'
Atayal  niq ‘eat’ : niq-un ‘eaten thing’
Paiwan  kan ‘to at’ : kan-en ‘food’
Amis  ajik 'to sweep' : aajik-en 'place to sweep'
**TB Verb-n > 'thing Verb-ed'**

Tib. za-ba 'to eat' : zan 'food, fodder, pap, porridge'.
     skyi-ba 'to borrow' : skyin-pa 'a thing borrowed, a loan'
     rdzu-ba 'to misrepresent, to delude, to falsify' : rdzun-pa 'falsehood, fiction, lie'

**Sa-Verb > instrument of action**

PAn Sa-Verb > instrument of action

Rukai to?to? 'to peck' : sa-to?to? 'beak'
Amis senat 'to harrow' : sa-senat 'a harrow'
Pazeh m-bazu 'wash clothes' : sa-bazu 'soap, soapberry'

**TB sa-Verb > instrument of action**

Gyarong ka-top 'to hit' (ka- verb prefix) : sa-top 'instrument for hitting'
Tib. 'bud to blow': sbud-pa 'bellows'
Kachin nan 'to light, illumine, as with a torch' : sha-nan 'a torch'

Old Chinese s-Verb > instrument of action

Old Chinese *tʰtiŋ 'to steam': *s-tiŋ-s 'earthen-ware pot for steaming rice'
     *lat(-s) 'to pull': *s-hlat 'leading-string'
     *njet 'bite, gnaw': *s-njet 'wooden wedge between the teeth of a corpse'

**-ar- distributed action; distributed object.**

This infix was inserted between the root initial and first vowel of a stem. Attached to verbs of action it indicated that the action was distributed in time (occurring over several discrete occasions), or in space (involving several agents/patients/locations); attached to stative verbs it was simply intensive; attached to nouns it indicated a referent distributed in space, i.e. having double or multiple structure.

AN -ar- distributed action/object; intensive

Paiwan k-ar-akim 'to search everywhere' (kim 'search')
     k-ar-apkap-an 'sole of foot'
Puyuma D-ar-ukap 'palm of hand'
Bunun d-al-apa 'sole of foot' (PAN *dapa 'palm of hand')
Amis p-ar-okpok 'to gallop'
     t-ar-odo' 'fingers, toes'
     k-ar-ot 'harrow'
Pazeh b-ar-anhan 'urn'
     d-ar-unudunj 'gong, drum'
Rukai Budai ma-D-ar-angDang 'hot' (weather)
     m-ar-eDang 'old' (compare Puyuma maidang 'old')
Tagalog d-al-akdak 'sowing of rice seeds or seedlings for transplanting' (dakdak 'driving in of sharp end of stakes into soil')
     k-al-aykay 'rake'

---

3 Gyarong has another prefix sa- expressing causative meaning in verbs (see above).
MALAY ketap 'to bite teeth' : k-er-etap 'to bite teeth repeatedly'

TB -r- distributed action/object

Burm. pok 'a drop (of liquid)' : prok 'speckled, spotted'
    phu? 'to protuberate' : pru3 'to protuberate, as the eyes'
    pwak 'to boil up and break, as boiling liquid' : prwak 'id'
    khwe2 'curve, coil' : khrwe2- 'surround, attend'
Kachin hpun [pʰun31] 'of pimples, to appear on the body' : hprun [pʰun31] 'pimples, on
    the body; to appear on the body, of pimples'

Chinese -r- distributed action/object; intensive.

Fuzhou nia?i3 'to blink' : nia?i1-liəi13 'to blink repeatedly'
    tsʰia55 'to turn, rotate, as a machine' : tsʰia33-liəi55 'to rotate in alternating
    directions, as an electric fan'
    pau213 'to protrude' : pa11-lau313 'to protrude much'
    tsij55 'to stare' : tsijd55-liij55 'to stare fixedly'
    tʰa?55 'pile or stack of (paper)' : tʰa11-ləa?333 'a pile of paper, irregularly
    stacked'
