HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers. L’archive ouverte pluridisciplinaire HAL, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d’enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.
Revelation Between Orality and Writing in Early Imperial China: The Epistemology of the Taiping jing

TPJ Taiping jing 太平經 (ZD fasc. no. 748-55, CTT 1101, juan no. 35-119)

TPJC Taiping jing chao 太平經鈔 (ZD fasc. no. 746-7, CTT 1101, juan no. 1-10)

ZD Zhengtong daozang 正統道藏 (Shanghai: Shangwu yinshuguan 商務印書館, 1923-26).

* E-mail: <gresp@yahoo.com>. The author wishes to thank John Lagerwey for his help in preparing this article.

2. References to the TPJC follow the usual protocol: <juan.page>. The TPJC is an abstract of the TPJ, in ten juan, which may date back to the 10th century; see Ren Jiyu 任繼愈 and Zhong Zhaopeng 鍾肇鹏, eds., Daozang tiyao 道藏提要 (2nd edition, Beijing: Zhongguo shehui kexue chubanshe 中國社會科學出版社, 1995; 1st edition 1991): 843-46. Each juan of the TPJC corresponds to one section (bu) in the table of contents of the TPJ from Dunhuang MS S. 4226 (see n. 1 above), with the exception of juan 1, for which a medley of Shangqing 上清 sources was later substituted; see Wang Ming, “Lun Taiping jing chao ‘jia bu’ zhi wei 論《太平經鈔》「甲部」之為”, Lishi yu yanjiusuo jikan 歷史語言研究所集刊 18 (1948): 375-84; Li Gang 李剛, “Ye lun Taiping jing chao ‘jia bu’ ji yi yu dao-jiao Shangqin gai zhi guanxi 也論《太平經鈔》「甲部」及其與道教上清派之關係”, Daojia wenhua yanjiu 道家文化研究 4 (1994): 284-99. The TPJC today preserves abstracts of four out of the five missing sections of the extant TPJ: sections jia 甲部 (juan 10), yi 乙部 (juan 2), xin 辛部 (juan 8), and ren 壬部 (juan 9); the last section of the TPJ (gui 戊部) and its TPJC abstract are both lost.
For more than seven decades, the *Taiping jing* (Scripture of Great Peace)\(^3\) impassioned and divided various specialists of China—Oriental scholars and Western orientalists—until present-day linguists, philologists and sinologists finally acknowledged that it conveys an ideology peculiar to the Han Dynasty 漢 times (206 B.C.E.-A.D. 220).\(^4\) The *Zhengtong daozang*, a collection of Taoist works edited during the Zhengtong 正統 era (1436-50) of the Ming 明 dynasty (1368-1644), has partly preserved this scripture. It is a text of problematic origins, somewhat tumultuous textual history and today fairly deteriorated content. Included in a scripturary collection related to a religion, this document was always considered a specifically religious text by Western research and therefore for a long time isolated from the study of the history of Chinese thought and relegated to missionaries.\(^5\) But some recent studies tend to prove that the TPJ foreshadowed “religious Taoism” (i.e. *daojiao 道教*) and indeed contributed to its formation rather than constituting its earliest known written manifestation.\(^6\) On this view, the TPJ and the entire scripturary tradition which the TPJ embodies is one of the keys to a better understanding of the changes in Chinese culture that accompanied the creation of a centralized imperial State, namely, the shift from a situation of remarkable intellectual profusion and liberty to a situation of submission to an orthodoxy and, to some extent, of literary

---

3. The first published Western study of the TPJ consisted of a 4-page footnote included in the translation into French by Paul Pelliot of a Buddhist text (see Paul Pelliot, “Meou-tseu ou les doutes levés: Traduit et annoté”, *T'oung Pao* 19 [1920]: 408-11); the first published Japanese study was Koyanagi Shigeta 小柳司氣太, “Go Kan jo 'Jô Kai den' no *Taihei shôryô sho* ni tsuite 《後漢書》「襄楷傳」の《太平清領書》について”, in *Tôyôshi ronsô* 東洋史論叢, ed. Kuwabara hakushi kanreki kinen kai 桑原博士還暦紀念會 (Kyôto: Kôbundô 弘文堂, 1930), 141-71; and the first published Chinese study was Tang Yongtong 湯用彤, “Du *Taiping jing* shu suo jian 《太平經》書所見”, *Guoxue jikan* 國學季刊 5.1 (1935): 7-38. The most complete published bibliography of 20th century TPJ studies is still the list appearing in Chen Ligui 陳麗桂, ed., *Liang Han zhuji yanjiu lunzhu mulu* 劉漢諸子研究論著目錄: 1912–1996 (Taipei: Hanxue yanjiu zhongxin 漢學研究中心, 1998): 391-407 (references no. 5227-5431). On the historiography of TPJ studies, see n. 11 below.

4. Burchard J. Mansvelt Beck, in “The Date of the *Taiping Jing*, *T’oung Pao* 66.4-5 (1980): 149-82, has summed up and discussed theories (mostly Japanese) concerning the dating of the TPJ. I have suggested in my doctoral thesis that, since all first-hand material is lost—with the exception of the fragmentary MS from Dunhuang—one should clearly distinguish the historical dating of the material (edited in the Ming collection of Taoist scriptures) from the dating of the ideas expressed in it. As I tried to show, these ideas reflect an *episteme* common to early imperial China. See Grégoire Espesset, “Cosmologie et trivfonctionnalité dans l’idéologie du *Livre de la Grande paix (Taiping jing 太平經)*” (Ph.D. diss., Université Paris 7-Denis Diderot, 2002), 359-89. So, in the end, I concur with Mansvelt Beck’s conclusions, as well as with those of most modern Eastern and Western specialists of the TPJ.

standardization.\textsuperscript{7}

We are now aware of the part played by literacy, which greatly expanded throughout the Han period, in the formation process of the imperial State in China;\textsuperscript{8} the authors of the Great Peace corpus raised the issues of the nature, origin, preservation, and transmission of knowledge at a decisive moment in the political and social history of China.

The social, moral, and cosmic decline which is dramatically deplored throughout the TPJ is described as the result of errors accumulated by men since the earliest ages,\textsuperscript{9} and it devolves upon men to remedy this disgrace by reverting to the state of original perfection referred to by the term \textit{taiping} 太平, “Great Peace”.\textsuperscript{10} However, the conduct of men of today, like that of their ancestors, frequently ends in fault (\textit{guo} 過), mostly because of ignorance (\textit{yu} 愚): ignorance of the rules presiding over the universal/cosmic order, ignorance of the perpetrated faults, and ignorance of the gravity (\textit{zhong} 重) of the faults—all often admitted in the text.

Much of the TPJ is structured as dialogues between a “Master” (\textit{shi} 師), a fictitious orator through whom the authors of the TPJ speak, and his disciples. The disciples, first and foremost, embody ignorance. The master often calls them \textit{yusheng} 愚生, “stupid students”, and the goal of the lessons which constitute the successive steps of his teaching is none other than to put an end to ignorance. Hence epistemology logically assumes a crucial role in the \textit{Scripture of Great Peace}, yet it is one among the themes which have been underestimated since modern TPJ studies began in the

\textsuperscript{9} This is the “inherited burden” (\textit{chengfu} 承負), a concept peculiar to the TPJ; on which, see Barbara Hendrichke, “The Concept of Inherited Evil in the \textit{Taiping Jing}”, \textit{East Asian History} 2 (1991): 1-30; and Michel Strickmann, \textit{Chinese Magical Medicine}, ed. Bernard Faure (Stanford: Stanford University Press, 2002): 39-44. On the issue of the moralization of cosmology in Han times, see also Wang Aihe, \textit{Cosmology and Political Culture in Early China} (Cambridge: Cambridge University Press, 2000), a valuable essay in which the TPJ is not mentioned.

\textsuperscript{10} For the various ideas conveyed by the term \textit{taiping}, see Barbara Hendrichke, “The Daoist Utopia of Great Peace”, \textit{Oriens Extremus} 35th year, 1-2 (1992): 61-91.
early 1930s. Among the few scholars who took some interest in this aspect of the TPJ should be mentioned Max Kaltenmark, who first contributed his depiction of the content of the TPJ to an international conference in 1972; Hachiya Kunio; Jens Østergård Petersen; and Chen Lin. As a result, though it seems that most of the field has already been marked out, such investigations prove incomplete. Although the theme of writing attracted the attention of these four scholars, orality in

12. See Max Kaltenmark, “The Ideology of the T’ai-p’ing ching”, in Facets of Taoism: Essays in Chinese Religion, ed. Holmes Welch and Anna K. Seidel (New Haven and London: Yale University Press, 1979), 24-29 (“The Revelation and the Texts”). Kaltenmark’s paper, translated in Japanese by Fukui Fumimasa 福井文雅, was to be published first in 1977 in the Japanese volume derived from the conference (“Taiheikyô no riron 〈太平經〉の理論”), in Dôkyô no sôgo-teki kenkyû 道教の総合的研究, ed. Sakai Tadao 酒井忠夫 [Tôkyô: Kokusanko kôkai 國書刊行会, 1977], 220-51; and a Chinese translation by Tian Xingxiang 田杏香 was published later on in Taiwan (“Taiping jing de yishi xingtai 〈太平經〉的意識型態”, Daqiao wenhua 道教文化 53.5.5 (1992): 3-17). These two translations in Asian languages bear witness to the lasting popularity of Kaltenmark’s paper which provides a good résumé of the theory of the gathering of texts with a view to their rectification, one of the key ideas of the TPJ, as we shall see.

13. See Hachiya Kunio 蜂屋邦夫, “Taiheikyô ni okeru genji bunsho: kyô, shû, tsu no shisô 〈太平経〉における言辞文書：共、集、通の思想”, Tôyô bunka kenkyûjo kiyô 92 (1983): 35-81. Hachiya Kunio’s study, which arises in a different sinological context and shows a much accurate understanding of the relevant material, is divided in three parts. The first part (ibid., 39-43) describes the origin of texts and the four stages of their transmission, from Heaven to master, disciple, prince and people—one of the possible syntheses of the models appearing more or less explicitly in the material (for instance, in chapter 6/102/166, the transmission of the master’s revelations obeys a ternary process which responds to the emblematic 天地人 triad: the master/Heaven, the disciples/Earth, and people-Man [462.2-4]). The second part (ibid., 44-53) characterizes two spheres corresponding to two kinds of writings: a heavenly sphere, whose writings are made obvious to men as astronomical phenomena (tianwen 天文), and a human sphere, whose writings divide in orthodox or correct (zheng 正) and heterodox or perverted (xie 歪) texts. Hachiya’s convincing thesis (ibid., 47-49, 52-53) assumes that both spheres meet around the three associated concepts of “community” (gong 共), “collection” (ji 集), and “pervasiveness” (tong 通). Ambivalence of writing in the human world is rightly stressed (ibid., 45) but, as in Kaltenmark’s paper, the specificity of the master’s text, merely ranked in the sphere of human writings, remains unclear. The third part (ibid., 54-55) does not deal with the main theme but depicts the thematic content of section geng 庚 (VII), which belongs to a secondary textual strata (see n. 62 below).

14. See Jens Østergård Petersen, “The Anti-Messianism of the Taiping jing”, Studies in Central & East Asian Religions/Journal of The Seminar for Buddhist Studies 3 (1990): 20-27 (“The Collation of a Supreme Scripture”). Petersen rightly points out the opposition between knowledge gathered up collectively and theories from a single man, which, in his view, is one of the evidences of the “anti-messianism” of the early TPJ, then the passage ends up abruptly as Petersen amusingly remarks that the TPJ sees the Emperor as a mere “editor-in-chief” of the “Supreme Scripture” to be edited (ibid., 27).

15. See Chen Lin 陳林, “Zhengwen zhengci yi xing taiping: Taiping jing wen zhi taiping sixiang qianyi 正文正辭以興太平。〈太平經〉文治太平思想淺議”, Zongjiaoxue yanjiu 宗教學研究 47.2 (2000): 16-21. Chen’s study, which focuses on the opposition between orthodox/correct and heterodox/perverted texts, shows how the former may lead the world toward the state of Great Peace and introduces the distinction between writings from common men and the text of the master, the only one among human writings which embodies and conveys universal laws (tiandi gefa 天地格法). Orality and its dimension in religious context are briefly dealt with (ibid., 19-20), with a casual reference to the ideas of Jacques Derrida (“法國當代思想家德里達”) with regard to the language issue—“sound and sign”, “word and writing”, “presence and absence”, an obvious allusion to the French thinker’s De la grammaïologie (Paris: Minuit, 1967).
the TPJ, on the other hand, remains undiscussed. Issues relating to the relationship between orality and writing have been thought to exclusively belong to ethnologists and anthropologists who investigate the specific field of cultures of oral tradition belatedly confronted with writing, as exemplified by Black Africa.¹⁶ As far as Chinese civilization is concerned, writing has now become one of the favorite topics of sinology worldwide but the study of orality has focused on songs, ballads, and poetry (including the Shi jing 詩經), some categories of narratives (including Buddhist), and the still appealing category of myths—but such issues as the “function” of orality and writing in the earliest stages of the development of Chinese civilization remain debated.¹⁷ As for “religious studies”, this issue is closely linked to revealed knowledge—i.e. knowledge transmitted to men by supernatural instances—and texts and their transmission. In the case of Taoism, modern studies have shown that the transmission of texts from master to disciple came along with the transmission of oral material, essential to their understanding and which was gradually fixed in a written form,¹⁸ if not merely lost—and this is why so many texts in the Taoist Canon are bound to remain hermetic to us. Nevertheless, it is generally admitted that in Chinese religion, writing is given prevalence over orality.¹⁹ The TPJ seems to be no exception to the rule, but the question does not boil down to a mere binary alternative and we shall see that, in the TPJ, epistemology has to deal with both defective vehicles of information.

1. Logos and revealed knowledge

In the scripturary tradition of Great Peace as well as in religious Taoism as a whole, musical sounds (yuēshēng 樂聲) are the expression par excellence of logos, i.e. the divine, cosmic Word.²⁰ The TPJ (9.9a-b) states that “musical sounds rectify the language of Yin and Yang, Heaven and Earth 樂聲正

Music, through resonance, attracts events [of a similar nature], just as, of the sounds emitted by men when opening their mouths, some are good, and some are bad; good ones lead to good fortune, and bad ones lead to misfortune. [708.7-8]

夫樂乃以音響召事，比若人開口出聲，有好有惡。善者致吉，惡者致凶。

But Heaven and Earth do not address Man by means of musical sounds or regular discourse: the task of informing Man of cosmic matters devolves on two embodiments of logos, Saints (shengren 聖人) and Saintly Masters (shengshi 聖師). The origin of their knowledge may then be identified with revelation, and thus revelation constitutes the primary condition of the entire epistemological theory of the TPJ. In the brief autobiographical account from chapter 3/39/50 where the master tells his disciples about his own apprenticeship and the way knowledge was transmitted to him, the revealed origin of what he hands down to them now is clearly explained:

When I began to study, I also asked questions of masters—not of a single man. (After) a

21. Textual references to the TPJ between brackets, following the protocol: [page.line], refer to Wang Ming’s collated edition, “Taiping jing” hejiao 太平經合校, 2nd edition (Beijing: Zhonghua Shuju 中華書局, 1979; 1st edition: 1960). Problems relating to punctuation in Wang’s edition were located and corrected in Takahashi Tadahiko 高橋忠彦, “Taiheikyō gōkō no hiōten ni tsute 『太平經合校』の標點について”, Tōkyō gakugei daigaku köyō: jinbun kagaku 東京學藝大學紀要: 人文科學 36 (1985): 231-44; various other corrections were published in Chen Zengyue 陳增岳, “Taiping jing hejiao shiyi 《太平經合校》拾逸”, Zhongguo daqiào 中國道教 31.3 (1994): 25-28; and “Taiping jing hejiao buji 《太平經合校》補記”, Wenxian 文獻 62.4 (1994): 219-28. But the major flaw of Wang’s edition is that the full table of content of the Dunhuang MS Stein 4226 (see n. 1 above), unfortunately published in Japan by Yoshioka Yoshitoyo the year following the publication of the Taiping jing hejiao in China, is virtually ignored, even in the 1979 reissue. Yu Liming’s 余理明 recently published edition, “Taiping jing” zhengdu 《太平經》正讀 (Chengdu: Ba Shu shushe 巴蜀書社, 2001), should be consulted for all linguistic problems; it also includes the full content of MS S. 4226; unfortunately, Yu has omitted Wang’s marginal notes in his edition and does not distinguish the master source (i.e. the TPJ itself) and the TPJC (a later, edited abstract version; see n. 2 above).

22. See TPJC, 7.31a: 天地不與人語也，故時時生聖人，生聖師，使傳其事。 [651.6-7]; 4.14b: 是故聖賢好天文文也。 [221.6]. Sages (xianren 賢人) deal specifically with written documents; see TPJ, chapter 3/42/56: 賢人職在理文書，皆授語。 [88.6-7]. Saints and Sages are ranked sixth and seventh in the ninefold human hierarchy (jiuren 九人) which is expounded in several passages from both the TPJ and TPJC. Chapter 3/42/56 lists the following degrees: 1: Incorporeal Divine Men who accumulated pneuma (wuxing weiqi zhi shenren 無形妄氣之神仙); 2: Divine Men (shenren 神人 or da 大 shenren); 3: Real Men (zhenren 真人); 4: Immortals (xianren 聖人); 5: Men of the Tao (daoren 道人 or da 大 daoren); 6: Saints (shengren); 7: Sages (xianren); 8: common people (jumin 凡民), called shenren 善人 (“benevolent men”) or liangmin 良民 (“good people”) in TPJC (4.14b); and 9: slaves (nubi 奴婢). In chapter 3/40/53, the same nine ranks are mentioned as successive stages of study (xue 學). A passage of the TPJC (4.15a-b) specifies that even a slave may reach the upper rank through assiduous study, i.e. revert to the sphere of pure pneuma—a belief consonant with the general ideology of Great Peace, as I have shown in “À vau-l’ eau, à rebours ou l’ambivalence de la logique triadique dans l’idéologie du Taiping jing 太平经”, forthcoming in Cahiers d’Extrême-Asie 14 (2004).
long, long time, having achieved Tao and accomplished Virtue, above I could unite my will with Heaven. Afterwards I knew what Heaven wished to say. Heaven has essential spirits of the Great Yang come and instruct me, and makes me speak. Therefore, it is Heaven that I have for a master.\(^{23}\) [70.4-5]

吾始學之時，同聞於師，非一人也。久久道成德就，適得上與天合意，適後知天所欲言。天使太陽之精神來告吾，使吾語。故吾者，適以天為師。

The master states in several places that he has humbly received the Tao from Heaven.\(^{24}\) All these passages point to what is best called a final (in the master’s eyes) revelation. The master then claims to be in possession of essential, perfect, and unaltered, knowledge, in a word: Truth. Reverting to Heaven, the origin of all things, was the necessary condition for discovering and embracing again the “will of Heaven” which Man had wandered away from over the ages. This view partakes of the underlying ideology of the Great Peace tradition as a whole, which contrasts a logic of willful, conscious reversion to the Origin—an individual as well as collective process regarded as a cosmic panacea to any form of trouble and disorder—to a logic of the natural, historic propensity of all beings (and things) towards dispersion and decay.\(^{25}\) However, the master also recognizes that human knowledge (whether it is of revealed origin or not is not made clear) has limits: “the heavenly Tao which governs Heaven is not totally knowable 天道治天，不可盡知也” [279.7] (chapter 5/70/106)—hence the impossibility to trust the words of a single man and the need to undertake a general process of revision of all written knowledge of all periods, as we shall see further on. The value of such revelations bestowed upon Man, “heavenly treasures [such as] mysterious charts and documents 天寶祕圖書”, is beyond compare and opposed by the authors of the TPJ to the earthly, material value of “precious objects, jades, and gold 珍物璧玉金錢” [129.5-6] (chapter 3/46/62). Their advent is not totally within the competence of Man but responds to human moral conduct;

---

23. The expression tian ming shi 天命師 [716.4], “master commissioned by Heaven”, appearing in the TPJC (9.19a), expresses in a like manner the heavenly—or, at least, claimed as such—origin and nature of the master’s mission (in the religious sense of the term) here below. This is the way the alternative denomination of the master in the TPJ, tian-shi 天師 (“Heavenly Master”), should be understood. The earliest occurrence of this syntax seems to go back to the Zhuangzi 莊子 (24/69/7), a work which also contains the expression: “to have Heaven for a master 以天為師” (25/73/13); I quote the version edited by D.C. Lau, A Concordance to the Zhuangzi/Zhuangzi zhuzi suoyin 莊子遂字索引 (Hong Kong: Commercial Press, 2000).

24. See, for instance, chapter 6/93/141: 是故吾敬受此道於天 [401.3].

when heavenly or divine writings or books (tianshu 天書 or shenshu 神書) are willing to appear and circulate among men, their way should not be blocked.

The function of revealed “texts” (wen 文) is best described in the following ternary process: “it is Heaven which makes them, the master who clarifies them, the sovereign who puts them into practice 造之者天，明之者師，行之者帝王” [704.12-3] (TPJC: 9.5a). In this process, the master plays a key role between the origin of revelation and its concrete finality, since the ruler, without the guidance from a master, is unable to use revealed knowledge (ibid.). Such an assertion shows the high opinion the authors of the Taiping corpus have of the epistemological role of the master and of the social and political position they expect him to occupy. Moreover, all documents (tushu 圖書) sent out by Heaven as an auspicious response (ruiying 瑞應) to the benevolence (shan 善) of the ruler’s thoughts express the cosmic sanction of power (TPJC: 2.14b): who is better qualified than a Heavenly Master to legitimate the reign of the ruler by authenticating such documents?

However, the content of revelation, spoken or written, as well as of the literary production of men, is generally referred to as “yan 言”, i.e. “word”, “speech”, “utterance” (TPJC: 8.10a-b). For example, the “versified rhymes of children” spreading among past and present people are “words” induced by the changes of Heaven, and the master calls the content of his teachings “the words of all spirits in Heaven 天上諸神言” [350.12]. Such revealed words, because of their nature, should not be put to test (勿試神言 [578.13]), unlike material of human origin. Elsewhere, mundane men (俗間之人) are stigmatized for not acknowledging “the content of the writings of Heaven 天書言” [621.12] (chapter 7/114/202).

But the Taiping corpus nonetheless states repeatedly that what Heaven bestows upon Man is “written documents 文書” (TPJC: 6.19b), such as the Hetu 河圖 (River Chart) and the Luoshu 洛書 (Writ of the Luo) conveyed to men in an already fixed, graphic form, by two supernatural ani-

26. The TPJ explicitly states that “Heaven transmits Its talk 天傳其談” by means of shenshu [174.8] while tianshu sometimes refers to tianwen ji 天文記, i.e. “astronomical records” in which should be registered all cosmic phenomena and cycles (see, for instance, chapter 3/50/73). But shenshu (14 occurrences in the extant material) may also be interpreted as an echo of the account of the revelation of one of the earliest Taiping texts, the Taiping qingling shu 太平清領書 (Book of pure instructions of Great Peace), under the reign of Emperor Shun 順 (A.D. 125-144) of the Eastern Han; see Hou Han shu 後漢書, Fan Ye 范曄 (398-445), ed. (Beijing: Zhonghua Shuju, 1965), 30B.1084. This Taiping qingling shu was submitted to the throne but first rejected on pretext of not being in conformity with the Classics (jing 經), then submitted again by Xiang Kai 戚軻 under Emperor Huan’s 桓 reign (146-167) and approved; but Xiang Kai was sacked by the faction of eunuchs (A.D. 166). See Rafe De Crespigny, Portents of protest in the Later Han Dynasty: The memorial of Hsiang K’ai to Emperor Huan (Canberra: Australian National University Press, 1976), and “Politics and Philosophy under the Government of Emperor Huan 159-168 A.D.”, T'oung Pao 66.1-3 (1980): 41-83.

27. See chapter 4/55/83: 神書欲出，亦不可開藏。 [211.4].

29. See chapter 3/50/71: 夫古今百姓行歌詩者，天變動使其有言 [174.8]. These “rhymes” were believed to foretell, in sibylline terms, such political events as the rise and fall of emperors and dynasties.
2. Orality between performativity and apophasis

The chapter 3/50/75, entitled “Text of divine invocations” (“Shenzhu wen 神祝文”), gives the reader a clue to the peculiarity of orality in the TPJ:

Essential utterances of divine Saints permanently in Heaven are at times transmitted to men. Spoken, they are used to make divine officials come and go in response to pneuma (qi 氣). People who get them call them “divine invocations”. Invocations which hit the mark one hundred times out of one hundred and ten times out of ten are the original texts of spirits in Heaven transmitted as canonical phrases. These invocations have the ability to make spirits mysteriously expel illness. Gather all [invocations] which hit the mark ten times out of ten, use them, and none towards whom they are directed will not be cured; simply spoken, they cure disease. These are the “prophetic utterances of spirits in Heaven” which good masters and sovereigns should use, collected in a volume entitled Zhuchen shu 祝謨書 (Book of invocations and prophecies). It is by summoning and employing a multitude of spirits that these [invocations] cure ten times [out of ten]. With those which hit the mark nine times out of ten, true spirits do not come [but] middle spirits; high ministers have them. With those which hit the mark eight times out of ten, it is human spirits which come; the well-ruled people has them. These are the utterances of spirits in Heaven used to summon spirits by name. At times they leak down to Earth; men of the Tao get to know them, transmit them orally to each other, and thus are capable of curing disease. If they were to use words of Man, they would not be able to cure disease. [181.3-9]

So if cosmic writing is the very embodiment of the logos, divine speech is nothing less than its performative medium, in other words the efficacy of logos, as opposed to ordinary, inefficient and, as we shall see, corrupting human speech. But some kinds of divine speeches are delusive and men

30. A horse (or dragon-horse) and a tortoise springing out from the waters of the Yellow River and River Luo; see John B. Henderson, The Development and decline of Chinese cosmology (New York: Columbia University Press, 1984), 82-87. Both documents are mentioned, in varying expressions (heluo 河洛, heluo 河雒 or hetu luoshu 河圖洛書), in the TPJ (41.3a, 4a; 43.2b; 47.11a; 48.7a; 88.1b; 91.1a; 102.3a; 112.4b) and TPJC (3.27a; 6.11b). On their relationship with the theme of “Great Peace” during the Han era, see Mashima Jun’ichi 門嶋潤一, “Taihei to Kato, Rakusho: Zen Kan Butei ki no taihei kokka no kōsō 太平と《河圖》、《洛書》。前漢武帝期の太平國家の構想”, Tōhō shūkyō 東方宗教 80 (1992): 1-14.
should beware particularly of the ill-omened words and vain discourses (yaoyan wangyu 祆言妄語) uttered by “perverse, heterodox spirits, xieshen 邪神” [440.5-6] (chapter 6/98/156).

From the symbolico-historical point of view of the TPJ, orality is believed to have filled the epistemological sphere in the Golden Age of Antiquity, as we shall see, before writing whose advent coincided with the final loss of the Tao by Man (TPJC: 9.14b). In the TPJ we are told that men of High Antiquity (chapter 7/110/179) and Middle Antiquity\(^{31}\) (chapter 3/48/65) lived, and governed, without texts (wu wen 無文) but that words circulated without loss thanks to their sincerity (cheng 誠) and trustworthiness (xin 信). But such perfect orality demands, as chapter 5/69/105 states with regard to prophecies (chen 謐), that not a single word should ever be modified during ten thousand successive generations,\(^ {32}\) because a gradual corruption of words is to be feared when they circulate in a single spoken form.

In chapter 3/37/48, the master shows how the loss of truth partakes of the accumulation of “inherited burden” (chengfu 承負), as falsehood (wei 偽) spreads from incorrect (邪不實) words told by a single master to ten disciples who, in turn, will mislead one hundred people, and so on exponentially until the whole of manhood falls into what European Sancta Inquisitio would have called “heresy” (xieshuo 邪說 [58.4-6]).\(^ {33}\) So, the master goes on to say, the cosmic consequences of the utterances of a single individual will be “disorder in the orthodox signs of Heaven 亂天正文” (i.e. astronomical anomalies) and “a great illness” here below (天下以為大病) [58.7-8]. In the same way, “empty words 空虛言” spread by a single man on the marketplace of the capital and repeated all around by people will finally overwhelm manhood with deception (qi 奸) [58.10-3]. Elsewhere, the audience is warned against people who like eloquence or emphatic speech (大言), for they are useless to the ruler, just like the vain discourses of sycophants (佞人) who know “numerous words 數言” but achieve no actual results and trouble the Tao [299.4-6]\(^ {34}\) (chapter 5/72/110). Uncon-

31. The first and second of three successive ages (sangu 三古) in the TPJ, namely a Golden Age of High Antiquity (shanggu 上古), then an age of decline, Middle Antiquity (zhonggu 中古), and then the period contemporaneous with the master/orator, known as Low Antiquity (xiagu 下古). But the text also admits of four successive series of reigns: the ideal epoch of the Three Augusts (sanhuang 三皇) and the Five Emperors (wudi 五帝), the age of decline of the Three Kings (sanwang 三王), and the decadent age of the Five Hegemons (wubu 五霸). The correspondence between the Three Ages and the four series of reigns is subject to variations and never clearly expounded. One of the possible reasons for this is that these classifications here serve the text’s ideology of inexorable decline rather than they referring to “historiographical” models.

32. Chapter 5/69/105: 一言過萬世不可易也。 [261.10].

33. For a similar theme in the Lüshi chunqiu 呂氏春秋, see Martin Svensson Ekström’s paper in the present volume.

34. In this passage, Wang Ming’s punctuation should be modified in accordance with Yu Liming, ed., “Taiping jing” zhengdu, 244.
trolled, deviant, and inaccurate orality thus proves detrimental to the entire universe.\textsuperscript{35}

As we can see, verbal inflation proves hazardous to the transmission of revealed knowledge. Chapter 3/40/53 deplores the verbal excesses of men (人言太多) and prompts them to revert to the original essentials of Tao (當還反其本要) [76.1-2]. An illustration of this theory is provided by the description of a ten-phase process of the perversion of knowledge through repeated transmissions (“uttered once 一言”, then “uttered and transmitted again 再轉言”, and so on until “uttered ten times 十言”) with its disastrous consequences [76.2-6]:

The final two phases overstep the bounds of epistemology and affect the social and political spheres. Orality proves a double-faced, dangerous medium when transferred from the heavenly sphere to the human world and its power is not peculiar to the revealed logos or the learned discourse of the holders of knowledge but applies to orality as a whole. Henceforth the syntagm “Keeping the One” (shouyi 守一), which is already known to overlap Taoist as well as Buddhist

\textsuperscript{35} Even if two quotations of the TPJ in an early eleventh century anthology of Taoist works, Zhang Junfang’s 張君房 (ca. 961-1042) Yunqi qigian 雲笈七籤 (CTT 1032), state that the speech of fools gives rise to calamities and harm which only affect fools themselves: 愚者出言為身患害，還以自傷 [735.9] (CTT 1032: 89.7a-b; 92.10b-11a). These two quotations are not found in the extant TPJ but may correspond to the title (probably incomplete) of chapter 10/159/339 in the Dunhuang MS S. 4226: “多言少決三百卅九” (I. 565). See also n. 44 below.

\textsuperscript{36} In late Six Dynasty or early Tang (Shangqing) Taoist historiography of the Taiping texts (see the preface attached to the ZD edition of the TPJ, the Taiping jing juwen xu 太平經文序: 1a-2a), this term was used to designate the divine, scripturary materia prima ultimately transmitted to Gan Ji 千吉 (also known as Yu Ji 千吉) and out of which the mundane TPJ “in 170 juan and 360 chapters” came into existence; in this special occurrence, it seems to refer to the (so far) indecipherable content of the four chapters 7/104/169 to 7/107/172 (see n. 83 below).
meditation practices," should also be understood in an epistemological context as “keeping the word one”.

Confronted with the dangers of orality regarded as an unavoidable cause of decay, apophasis may appear as a radical but safe way out. The TPJC (2.15a-b) condemns oral excesses (which, besides, are said to exhaust the vital, physiologic principle of “essence” [26.6]) as opposed to the quietness (qingjing 清靜) and silence (wusheng 無聲) of divinities (shenling 神靈). In chapter 6/98/157, the master logically advises his disciples:

Henceforth, to follow the Tao, concentrate your mind, keep your mouth closed, and do not speak in vain. [443.9-444.1] 
是故夫為道者，專汝心，閉汝口，毋妄言也。

In the same chapter, the master says that Heaven, Earth, the Four Seasons, Three Luminaries, and Five Agents—everything in the whole universe, including the world here below—“practices the Tao without speaking 行道而不言” [444.2-5]. And, a bit further on, he states anew that “[if one’s] mouth does not speak recklessly, [one] will be able to obtain the Tao 不妄言則道可得也” [444.6]. Chapter 6/97/155 expresses an analogous warning:

Words should constitute models. Better to keep silent than to utter words which do not constitute canonical behavior. To make inaccurate statements is a grievous fault which cannot be removed. [437.2-3] 
言當成法。言不成經，不若默也。舉言不中，罪深不除。

But how is teaching conceivable without the oral medium, especially in the case of a master

38. Together with strength and martial excesses which are said respectively to “strain the body” and “harm the person”: 用力多者苦其形，用武多者賁其身 [26.6-7].

39. In chapter 5/71/108, which belongs to the third textual layer (see n. 62 below), obtaining longevity (shou 寿) is connected with the observance of the “precepts of the Tao” (daojie 道戒), and the Divine Man (shenren) advises the Real Man (zhennan) to “keep his mouth closed 閉口” so as not to let “transpire 流” his essential spirits (jingshen 精神). Physiology and epistemology naturally meet around the idea of preserving the fundamental principles, which is nothing else than “keeping of the one” (shouyi) in terms of meditation.

40. That is, erased from the registers of moral conduct kept up to date by divine officials of the heavenly bureaucracy and on which depend the individual life allotment and afterlife status of men, as variously alluded to throughout juan no. 110-2 and no. 114 of the TPJ.
whose spoken lessons and dialogues with disciples cover several hundred pages? As I have already suggested in the introduction, one of the basic functions of orality in the context of traditional Chinese religious education was to complement the transmission of scriptures by means of secret, spoken, supplementary material. In this regard, chapter 5/70/106, entitled “Xuezhe deshi 學者得失” (“What is appropriate to study and what is not”), values the “oral instructions of masters”, which disciples should not disobey (學於師口訣者，勿違其師言 [277.2]), since reading written documents oneself without the instructions of a master might lead to a separation from the guidance of the Tao. But, beyond those “oral instructions”, what is the tenor of the master’s teaching? The answer is dialogue, or, more precisely, questions and answers: questions from the disciples tackling a new issue and answers from the master throwing light on the subject; or questions of the master about themes formerly lectured on, designed to check the improvement of his audience; or hesitating, frequently erroneous answers of the disciples calling for extra explanations from the master. In many instances, the master simply returns the questions of the disciples to them in order to have them speak erroneously before showing them the right way, or inversely to have them conceive correct knowledge themselves—one thinks of Socrates assisting one of the slaves of his pupil Meno to execute a basic geometrical experiment step by step until the young man finally “remembers again” forgotten knowledge and gives birth to the correct rule himself.

In this fashion the TPJC shows how the efficacy of “conversion” (hua 化) and “education” (jiaohua 教化) depends on orality. “Benevolent masters”, said to appear on Earth at cosmically propitious times, “convert (their audience) to benevolence by means of benevolent speech 善師使善言善化 [651.7] (7.32a). But teachings which are morally condemnable are nevertheless loaded with power, for under unpropitious circumstances, when the Tao of Heaven is confused, “malevolent masters” appear and, in the same way, convert people to malevolence by means of ma-

41. 論書見其意而守師言見訣解者，是也。讀書不師訣反自言深獨知之者，非也，內失大道指意也 [278.7-8].

42. The dialogue form is undoubtedly connected with the hermetic tradition of the Yellow Emperor as exemplified in the Huangdi neijing 黃帝內經 but a thorough study of the issue has yet to be done. The dialogue parts of the TPJ have been tentatively discussed by Barbara Hendrischke in papers contributed to two conferences but still unpublished: “Taiping jing zhong tianshi yu dizhi de duihua 《太平經》中天師與弟子的對話” (paper presented at the Second International Academic Conference on Taoist Culture 第二屆道家文化國際學術研討會, Luofu shan 羅浮山 [Guangdong], 28-31 December 1998), and “The Place of the Scripture on Great Peace in the Formation of Daoism” (paper presented at the International Conference on Religion and Chinese Society: The Transformation of a Field and Its Implication for the Study of Chinese Culture, The Chinese University of Hong Kong, 29 May-2 June 2000).

43. Plato, Meno, 82a-85c; references are to W.R.M. Lamb, trans., Plato, vol. 2 (Cambridge and London: Harvard University Press, 1990). In this famous anecdote, here used by Plato to support his theory of ἀνικητικόν or “reminiscence” (Meno, 81c-d), Socrates—who reportedly compared himself with a midwife—uses “maieutics” to have Meno’s young slave solve the mathematical problem and to convince Meno of the validity of his own epistemological theory at the same time; see Michel Nargy, “Enseignement et dialectique dans le Ménon”, Revue Internationale de Philosophie 90.4 (1969): 474-94; and Alexander Nehamas, “Meno’s Paradox and Socrates as a Teacher”, Oxford Studies in Ancient Philosophy 3 (1985): 1-30. But rhetoric in the TPJ never goes this far, and the truth of the master is generally spoken in contrast with the (erring) common sense of the disciples.
levolent speech (善言不若言行) [651.7-8]; ibid.). So orality proves double-faced in an educational context. It should be remembered, however, that the basic tool of the master’s teachings is only a stage in the epistemological program of the TPJ, for it is stated elsewhere that “learning benevolent speech does not compare with learning to put (it) into practice on oneself 習善言不若習行于身” (TPJC: 2.13b), as we shall see further on.

After stating that “the heavenly Tao . . . is not totally knowable” (as quoted above), the master continues by saying that “it is not allowed to believe in the utterances of a single individual 不可聽信一人之言” [279.7] (chapter 5/70/106). For, as he explains elsewhere, the knowledge of a single individual, even a Sage, encompasses only one aspect (一方面) of the meaning of the Heavenly Tao, and the words of such a man are consequently “biased” (偏): following them would unavoidably lead to “shallowness” (浮華) and ultimately provoke the usual set of general, cosmic disasters (chapter 3/50/72). Considering that the master seems hardly to tolerate any rival teacher other than his own (Heaven), such peremptory assertions may sound paradoxical; but they can also be interpreted as a rejection of the spontaneous, “prophetic” (in Max Weber’s words) stage of religion as opposed to a stage of canonical and institutionalized religion. Not surprisingly, one of the features of subsequent elite religious Taoism will precisely be firm opposition to such uncontrolled forms of religiosity.

3. Writing: the ideal vehicle of revealed knowledge?

In chapter 4/54/81, the title of which is “No quarreling” (“Wu zhengsong 無爭訟”), the master says that for all beings in the universe to coexist harmoniously, they are required to stand at the place which befits them and they should be employed according to their actual abilities. Again we meet

44. Though the second textual element I quote here does not contain the character yan 言, the symmetry and the theme of the passage both suggest that the tool of malevolent masters is “malevolent speech”, hence my translation. The syntagm yan 言 is attested to in the TPJ, especially in chapters belonging to the third textual layer (see n. 62 below). Two quotations of the TPJ in the Yunji qiqian (see n. 35 above) deplore the scarcity of benevolent speech and the opposing abundance of malevolent speech: 善言無多，惡言無少 [735.5-9].

45. In like manner, the TPJ (chapter 6/93/141) symmetrically opposes the unfruitfulness of speech to practice (人多言訟不效行 [401.2]) and empty words to concrete realization ( 不效實訟不效言也 [401.3]). Elsewhere (chapter 6/96/152), the master says: “My method does not consist in verifying words but in striving to verify practice; (for) how may one know that my Tao responds to Heaven and have faith in it (if) it is not practiced? 予為道不試言也，乃求試行。不行之，安知吾道與天相應而信哉？” [421.10-1]. See also § 4. and 5. below.

the idea of a specific language of the universe, for it is also required that the intentions of Heaven and Earth are clearly perceived by the sovereign. Thus is the master led to expound the respective “languages” of the four major ontological kingdoms—Heaven, Earth, Man, and the Ten thousand beings:

The written records of Heaven are the Three Luminaries, which rise and decline alternately so as to influence the sovereign of men. The graphic principles of Earth are mountains, rivers and roads; mountains spew vapor, water circulates in the veins [of Earth; all] decline and blossom, move, collapse and reform so as to influence differently the ministers of men. The speeches of Man are transmitted orally and written records are passed on. The Ten thousand beings, by speaking through [their cycles of] decline and blossoming, make men think and know them. [205.4-6]

天者，以三光為書文記，則一興一衰，以風為人君。地者，以山川阡陌為文理，山者吐氣，水通經脈，衰盛動移崩合，以風異為人臣。人者，以言語相傳，書記文相推移。萬物者，以衰盛而論語，使人想而知之。

The master explains that all these “words” (yan) must circulate (tong 通) in order to avoid disasters. A disciple then remarks that, “in Antiquity, there was no literacy; how could [words] circulate? 古者無文，以何通之” [205.11]. The master replies by describing the appearing and disappearing of writing through the Three Ages46 in response to the vicissitudes of cosmic pneuma and mankind: as men of Low Antiquity 下古 (i.e. today) suffer life span reductions because of their ignorance (yu) and are unable to remember things, writing becomes necessary, for “without writing, [men] would argue with each other, be unable to set each other right, and everyone would voice his own truth 無文且相辯詁，不能相正，各自言是” [206.4]. So, when orality meets its natural limits and allows the multiplication of competing truths, writing is called on to replace it as a vehicle of knowledge. Thus writing seems to be above all the fruit of necessity.

The transmitted material reflects the importance of this informational vehicle in the eyes of the propagators of the TPJ. Chapter 7/108/173 of the text enumerates “nineteen essential instructions 要訣十九條” which are actual “directions for use” intended for the TPJ reader; ten of these instructions relate directly to writing.49 The superior value of writing also appears in chapters 4/65/100 and 4/65/101, where it is stated that the favors of the sovereign should consist of texts for

46. Sangu 三古; on which, see n. 31 above.

49. Essential instruction no. 2 deals with a category of texts called “sandao xingshu 三道行書”; no. 4, with the rectification of ordinary texts; no. 5, with the reliability (xin 信) of the master’s writings and their practice; no. 9, with their complete understanding; no. 10, with the checking of their effectiveness; no. 14 and 15, with “collecting and collating” (jujiao 折校; on which, see text and n. 63 below) various kinds of documents; no. 16, with the appearance of “real texts 真文” and the elimination of “heterodox, false texts 邪偽文”; no. 18, with talismanic characters to be ingested; and no. 19, again with writings in practice. See my tentative translation and analysis of this chapter in “Cosmologie et trifonctionnalité”, 342-53. The single published investigation of the purpose of this short chapter appears in Lin Fushih, “Shilun Taiping jing de zhuzhi yu xingzhi”, 216-26.
the Sages, food for the starving, and clothing for those who suffer from the cold: 見賢者 賜以文，
見飢者 賜以食，見寒者 賜以衣 [228.10]. “What kind of texts?” a disciple asks. “Just assemble all
written documents of the true Tao of all Three Ages”, the master replies, “take the best parts of
their content and collect them to form a ‘Heavenly Scripture’ 但拘上古中古下古之真道文文書，
取其中大善者，集之以為天經” [229.5]. The master adds that each and every Sage should be
granted a copy of this book and recite it aloud (songdu 誦讀). But both chapters state explicitly
that, in return, people who get “remarkable and extraordinary recipes 殊方異方” [230.3] (chapter
4/65/100) or “marvelous, extraordinary, and remarkable recipes, and texts (expounding) benevolent
means 奇異殊方善道文” [231.1] (chapter 4/65/101) should not conceal (ni 匿) them for their own
benefit but hand them over to the sovereign so as to help him to achieve longevity (laoshou 老壽).

However, a fundamental limit must be marked out between admissible texts and other ones,
as the master says in an answer to a question from a disciple (chapter 4/65/100):

Other documents, which are not texts of the “orthodox Tao”, make eminent scholars become
confused, are unprofitable to governmental affairs and are not [a way to] nourish one’s vital
principle. Canonical writings, which eminent scholars recite daily, entail shallowness; this is
why they are not acceptable.50 [230.6-7]

Yet the master adds that the best parts of the “Saintly Canons 聖經” of the Three Ages may be col-
lected and bestowed upon people in order to convert them to benevolence (shan 善), even if these
texts do not deal with “the way to nourish [one’s] vital principle 養性之道”. The TPJC (8.5b-6a)
states that households which accumulate “true texts and true Tao 真文真道” will subsequently sur-
vive through generations (dushi 度世), i.e. transcend the regular categories of life span (as ex-
pounded in the TPJC).51 Inversely, households which accumulate perversions (xie 邪, also
“heterodoxy”) will surely incur disaster.

In chapter 5/70/106, the master introduces another antithetic couple, “exoteric texts 外文”
and “esoteric texts 內文”, which are opposite but complementary categories: we learn from chapter

儒」、「善儒」、「乙密」”, Zhongguo yuwen 中國語言 264.3 (1998): 222-23, xianru 賢儒 (“eminent scholars” in
my translation) does not refer to Confucian scholars nor the educated here, but to learned individuals among Taoist fol-
lowers themselves. According to Petersen (“Which Books Did the First Emperor of Ch’in Burn? . . . ”, 34), the earliest
uses of ru 儒 with special reference to Confucianism appear in the Hou Han shu, completed in 445 (for the evolution of
the meaning of ru in pre-imperial and early imperial sources, see also Zufferey, “Le Premier Empereur et les
lettres . . . “, 80-95). Then does jingshu 經書 (“canonical writings” in my translation) explicitly allude to the Confucian
classics?

51. I.e. 120, 80 and 60 years (TPJC: 2.11b-12a, 10.5a-b), or 120, 100, 80, 60, and 50 years (TPJC: 6.7a). The text
(2.12a) adds that what is called “surviving through generations” (dushi) is “to transcend these [categories of] longevity”,
noteably as a result of “unceasing benevolent conduct”: 如行善不止，過此壽謂之度世 [23.4].
5/70/106 that esoteric texts allow one to shed light on exoteric texts while exoteric texts, which are connected with esoteric texts, allow one to check them in turn. The master neglects to deal any further with “exoteric texts”, a term which we may safely assume refers to material available to the profane regardless of any religious membership, but he warns the disciples not to associate “esoteric texts” with “prophecies 圖谶”, otherwise they would fail to understand their essential import (revelation) and end up in delusion [277.3-4].

Chapter 4/65/101 states that Saints and Sages of Antiquity valued “texts of Tao and Virtue 道德文” and used to set them in a high place while weapons and preparations for war (兵革戰備) were kept within reach but in a low place; so “if each individual who dwells alone sets texts on his bed while weapons are kept underneath, then barbarians will spontaneously submit themselves and brigands will vanish from day to day 一人獨居則授文於床上而兵居床下，如是則夷狄自降，盜賊日消滅矣” [231.11-2]. Such is the beneficent power of the written/the non-military (wen 文), as opposed—classically—to armament and the martial (wu 武), purveyors of social disorders, various abnormal phenomena, and general cosmic turmoil (chapter 4/65/99). So, in addition to its basically epistemological function, writing takes a remarkable part in the social sphere. Another example is given in chapter 6/93/137 where the master, in order to show how the smallest being in the universe has the power to “move” (gandong 威動) Heaven, says analogically that even the humblest victims of robbery are entitled to submit a memorial (shang shu 上書) to the Emperor, who will then decide on the proper action to be taken locally in response to this threat [385.4-7]. Epistemological and social functions alike share a belief in the general circulation of information, goods, wealth, pneuma, etc., expressed repeatedly throughout the text.

The status of wen, however, is far from unambiguous in the various classifications provided throughout the TPJ. In chapter 4/65/101, for instance, wen is associated to a relative, if not clearly consummate state of decay, while Tao, on the upper level, is associated to High Antiquity and Virtue (de 德), to Middle Antiquity. As for the successive series of reigns (see n. 31 above), the Three Augusts are said to have ruled through Tao, the Five Emperors through Virtue, the Three Kings through wen, and the Five Hegemons through wu (chapter 7/115/205). Chapter 4/67/103 enumerates “ten methods 十法” to assist the rule of the sovereign; strikingly, wen only appears as model no. 8

52. 以內文者，明其外文，以外文者，還考繫其內文也。” [279.11-12]. Exoteric and esoteric texts are in turn correlated with waixue 外學, “outer studies” (i.e. “Court studies 朝廷之學”) and neiixue 內學, “inner studies” (to be undertaken “in retreat 入室”). Interestingly, the authors of the TPJ refrain from giving to one kind of study preeminence over the other as both are said to have their own achievements as well as their own limits; for instance, uncontrolled “outer studies” may entail shallowness (fuhua) and license with regard to proscriptions (不能自赦) while uncontrolled “inner studies” may divert from the orthodox way (不應正路) and lead to “great heterodoxy or perversion 大邪” [276.7-8].

53. But, not surprisingly indeed, memorials should never be submitted by a single individual, as we shall see further on (see § 4. below).

54. As already pointed out by Kaltenmark, “The Ideology of the T’ai-p’ing ching”, 35.
and so ranks among the five lesser models against which the disciples and the reader are advised.  

In the epistemological views of the TPJ, writing, just like orality, fails to serve perfectly as a vehicle of knowledge. Written documents are said to give birth to commentators who argue about the meaning of their content but fail to understand it (chapter 3/50/72). In two quotations of the TPJ in the Yunji qiqian, the abundance of “compositions produced by past and present Saints and Sages”, which are said “to fill up the space between Heaven and Earth” (古今聖賢也，出文辭滿天地之間 [735.6]), is criticized in the same way as verbal excesses, “duo yan 多言” (see § 2. above). The multiplicity of written documents—as well as deceiving (qi 欺) texts—entail shallowness (fuhua), confuse eminent scholars (xianru 賢儒; see n. 50 above), and causes wandering from the intentions of Tao; this is why “once Heaven has produced texts, words should not flow any more 天既生文，不可復流言也” [155.7] (chapter 3/48/65). Shallowness (fuhua) is clearly and repeatedly associated with “forged texts 偽文” (chapters 3/49/66 and 6/97/154), and deceiving texts are accused of depriving men of descent (chapter 3/50/68). The multiplicity of written documents is said to “dazzle 眩眾” men (chapter 6/98/158); and it is useless to accumulate books which prove useless to the sovereign (TPJC: 5.14b).

As we have seen before in the case of words (yan), the Tao similarly suffers a temporal process of perversion through the transmission of written documents (chapter 3/51/78). The master first states that “correct or orthodox texts originate in the designs of Heaven and Earth, and comply with primordial pneuma (yuanqi 元氣)”; he adds: “in Antiquity, when saintly writings appeared, [their] origin and the correctness of [their] characters were checked”,

Whether transmitted orally or under a written form, knowledge, which is assimilated to the
Tao and was formerly revealed unaltered to the Sages of Antiquity, seems to be incurably doomed to perversion when falling into the hands of Man. All the masters who, following the Sages of Antiquity, have been instructing men through the ages, are responsible for having “interrupted [the transmission of] and concealed such texts of the true, essential Tao, for having taught with shallowness, and transgressed the essential intent of the heavenly Tao 絕匡其真要道之文，以浮華傳學，違失天道之要旨” [55.3-4] (chapter 3/37/47). Therefore, in spite of their numbers, the extant texts of men are unable to prevent brigands and disasters from appearing, and this is precisely why Heaven sends the master to rectify the situation (TPJC: 9.18b-19a)—or, in another instance, Saints to correct, or rectify (zheng 正), “tianwen 天文”, i.e. “Heavenly texts” as well as astronomical phenomena (TPJC: 9.11a). For, when “the texts of the Saints 聖人文” are in disorder (luan 亂), it is the same with the Tao; and when they fall into disuse (廢而不用), so does the Tao (TPJC: 9.14a-b). Consequently, a general collecting and a thorough recasting of all the documents of all ages prove to be indispensable to revert to a state of perfect Tao as much as to restore unaltered Truth.

4. Early Chinese encyclopedism

Although the general theory of the epistemological program of the TPJ is mainly expounded in two chapters of the master text (no. 3/51/78 and 6/96/152), the theoretical implications of this program are actually disseminated throughout the material and are subject to variations from one place to the next. Beginning with the issue of collection of extant material, we find that the prevailing principle is the idea of a general collection of all extant written documents. For example, we are told in chapter 3/41/55 that, in order to relieve the world from harm, the purpose of the schooling of disciples is to transmit to the sovereign a compendium (still to be edited) entitled Da dongji tian zhi zhengshi 大洞極天之政事 (All-pervading governmental affairs) which would gather in one single place all useful knowledge to put an end to the “inherited burden” (chengfu) and substitute for all other books which deal only with one matter or topic (一事). To this end, the TPJC (8.4a-b) mentions resorting to sealed cases (feng 封) placed in each administrative district so as to collect writings which should be freely submitted by the masses; civil officers would then gather these cases and deliver their content to the Emperor.

The material thus collected has then to be classified before its selective treatment may be un-

57. Compare this six-phase process of perversion of perfect texts with the ten-phase process of perversion of knowledge from chapter 3/40/53 (as pictured above).

58. Feng 封 is glossed as guihan 費翰 in what is probably an interpolated commentary [687.7].

59. But the text specifies that these arrangements are specifically designed to enable the Emperor to hear about the moral inclination of his subjects through their remonstrances, not to have a sum of orthodox knowledge edited.
dertaken. Yet no fixed taxonomic principles seem to prevail, and various sets of documents are
sometimes dealt with in a single chapter: e.g. the four categories of “heavenly, earthly, human, and
divine texts 天文地文人人文神文” [87.9] (chapter 3/41/55); or the three declining categories of
“writings of the divine Tao 神道書”, “texts examining facts 核事文”, and “shallow records 浮華記”
[718.3] (TPJC: 10.1a; MS S. 4226: l. 10-1; CTT 1032.6.15a-b), or the three categories of
“heavenly scriptures 天經”, “earthly scriptures 地經”, and “human scriptures 人經” [307.11-12]
(TPJ: 5.12b-13a). The most synthetic classification, expounded by the master on a disciple’s re-
quest, is to be found in a TPJ quotation from Zhu Faman’s 朱法滿 Yaoxiu keyi jieliu chao 要修科儀
戒律鈔 (CTT 463.1.2a-b) [308.8-14]:

These ten scripturary categories are based on a triad (Heaven-Earth-Man), on a median sec-
tion of the TPJ’s ninefold human hierarchy (in which “men of the Tao”, “Saints”, and “Sages” are
ranked fifth, sixth and seventh; see n. 22 above), and on two classical Chinese antithetic couples (the
auspicious and the pernicious 吉凶, life and death 生死). This scripturary taxonomy should be read
in the light of chapter 3/41/55 (“Jian guwen mingshu 件古文名書”), where the master explains at
length the meaning of the master-concept jujiao 拘校, literally “to collect and collate [documents]

60. CTT 1032, which quotes the TPJ, has the second category spelled “敘事文”, a graphic variant which does not alter
the meaning. Yang Jilin 楊寄林, “Taiping jing ‘shu you san deng’ xiyi 《太平經》「書有三等」析義”, Zhongguo
daojiao 74.2 (2003): 30-33, has argued, rather unconvincingly, that these three categories refer to the content of the
TPJ itself.

61. On which, see Anne Cheng, “De la place de l’homme dans l’univers: La conception de la triade Ciel-Terre-Homme
rebours . . .” (forthcoming).
a term which pervades all the “textual strata” of the extant material. The idea of jujiao, as we learn from chapter 6/91/132 (entitled “Jujiào sangu wen 拘校三古文”), was revealed to the master by Heaven Itself (故後使其拘校之者，過天使下言也 [349.1]). The following three out of nineteen “essential instructions” (yao jue 要訣) from chapter 7/108/173 (see above) are concerned with jujiao (no. 4, 14, and 15):

For those who want to rectify ordinary texts: get the instructions relating to “collecting and collating”, as a token of faith from Heaven. [510.8]

其凡文欲正之者，取訣於拘校，以為天信。

For those who want to obtain a method which produces a great rise of the heavenly Tao: get the instructions relating to “collecting and collating” the numerous texts and formulas and essays of ordinary men. [511.10]

欲得天道大興者，取訣於拘校眾文與凡人訣辭也。

For those who want to obtain fine medicine: get the instructions relating to “collecting and collating” ordinary methods and texts so as to make use of them. [512.1]

欲得良藥者，取訣於拘校常方而效之也。

Still in chapter 3/41/55 of the TPJ, one of the disciples having remarked that he is (or all of them are) “unable to deeply understand the meaning of this [word], jujiao 不能深知其拘校之意” [83.7-8], the master explains:

What is meant by “collecting and collating writings of the Tao of Upper, Middle and Lower

62. Modern sinology assumes the canonical TPJ to be made out of distinct textual “strata” or “layers” that scholars have been trying to distinguish since Xiong Deji’s paper published in the early 1960s; see Xiong Deji 熊德基, “Taiping jing de zuozhe si xiang ji qi yu Huangjin he ‘Tianshi dao’ de guanxi 《太平經》的作者和思想及其與黃巾和「天師道」的關係”, Lishi yanjiu 歷史研究 4 (1962): 8-15. All subsequent attempts at distinguishing strata or layers in the extant material are dependent upon Xiong’s system; see Takahashi Tadahiko, “Taihei kyo no shisho kozô 《太平経》の思想構造”, Tôyô bungaku kenkyûjo kiyô (1984): 296-97; Jens Östergård Petersen, “The early traditions relating to the Han Dynasty transmission of the Taiping Jing: Part 2”, Acta Orientalia 51 (1990): 198, 212-3; Hendrichke, “The Concept of Inherited Evil...”, 3-5; Wang Ping 王平, “Taiping jing yanjiu 《太平経》研究 (Taipei: Wenjin chubanshe 文津出版社, 1995), 13-15; and Duan Zhicheng 段致誠, “Taiping jing wenxian kaobian: dui Taiping jing chengshu qingxing de yixie kanfa (xia) 《太平經》文獻考辨。對《太平經》成書情形的一些看法（下）”, Kong Meng yuekan 孔孟月刊 37.7, 439 (1999): 26. Distinguishing such strata or layers does not solve the numerous problems of the textual history of the TPJ but, at least, underlines the obvious stylistic variations occurring in it. In short, the three prevailing styles which were isolated are: 1) questions and answers (or “dialogue form”), the style which covers the majority of the material by staging a Master (shi 師) or Heavenly Master (tianshi 天師) and Real Men (zhenren 真人) who are his disciples (di 弟); 2) a strictly discursive style (or “prose”); 3) monologues and dialogues alternating, a style also characterized by the presence of two protagonists absent from the rest of the text: a Heavenly Lord (tianjun 天君) and a Great Spirit (dashen 大神).

antiquity” is [the following]: let us suppose that numerous Sages together read carefully all past and present texts of the Tao; if in one volume they get one good word or one good formula, then they record it in writing; to get one good [word or formula] in one volume [is to get] ten in ten volumes, one hundred in one hundred volumes, one thousand in one thousand volumes, ten thousand in ten thousand volumes, and one hundred thousand in one hundred thousand volumes; [but if] in one volume they get ten good words or formulas, in this way [they may get up to] one million good words [or formulas; and if] in one volume they get one hundred good [words or formulas], in this way [they may get up to] ten million good words [or formulas]. Having them recorded in writing and gathered in a single place, the numerous Sages together examine [these] past and present writings, transcribe them, gather them into categories according to their respective specialities, delete the repetitions, compile their essential parts, thoroughly analyze [their content], and thus understand deeply the quintessence of Heaven, Earth, Man, and the ten thousand beings in past and present. The text produced in this manner is the “Heavenly Scripture”.\textsuperscript{64} [84.2-8]

As we can see, jujiao refers to a meticulous process of selection and compiling. After this “Heavenly Scripture” (no. 1 in the previous tenfold nomenclature), a “Scripture of Saints” 聖經 (no. 5) and a “Scripture of Sages” 賢經 (no. 6) should be similarly edited [84.9-85.1]. All three books would be gathered into a “Scripture encompassing all Heaven and Earth, and Yin and Yang”, i.e. a “universal scripture” whose ultimate condition should be carefully preserved through “myriad generations” (此道書者，名為洞極天地陰陽之經，萬世不可復易也。 [85.5]).\textsuperscript{65} Such a process suggests that the basic principle of selection can be defined as extracting from all collected material the very best of its content. This task should be carried out with caution as each “perverse (or heterodox) text 邪文” left over in the collected material will induce one extra cosmic disease and, as cosmic diseases pile up, men would be stricken by illness themselves.\textsuperscript{66} All things considered, this editing process described at greater length comes down to the sorting out of documents so as “to reject perverse (or heterodox) text 去邪文”, a theme central to the title and content of chapter 3/50/67, “To reject perverse/heterodox text and to observe celestial bodies” (“Qu xiewen feiming zhan 去邪文 from chapter 3/50/67). 

---

64. We have already met a summary of this process in chapter 4/65/100 (see above, §3).

65. This “universal scripture” and its variants are mentioned in 5 chapters of the TPJ (no. 3/41/55, 6/88/129, 6/91/132, 6/96/152, and 7/112/188) and 3 juan of the TPJC (6.11a, 11b, 12b, 7.22b, and 8.3b) as “洞極之經” (8 occurrences), “洞極經” (3 occurrences), “大洞極之政事” (3 occurrences), “皇天洞極政事之文”, “天洞極政事”, and “洞極之古文” (one occurrence each). See also Kaltenmark, “The Ideology of the T'ai-p'ing ching”, 25; and Hachiya, “Taiheikyô ni okeru senji bunsho . . .”, 50-52.

66. See chapter 6/91/132: 有餘一邪言概餘一病，餘一邪說誤文概有餘一病，餘十十病，餘百百病，餘千千病，餘萬萬病，隨此餘邪言邪文誤辞為病。天地病之，故使人亦病之。 [355.6-7].

22
texts of squander and disorder, texts of the Central Harmony, texts

category: writings which by chance hit the mark. These texts are also mentioned as “texts of the orthodox Tao 正道文” and, once again, are said to lead people to “confusion 迷途” (chapter 4/65/100).

Pragmatism plays an important part in this editing process. According to the TPJ, the best way to deal with the numberless “texts of Antiquity 古文” is to put them to a practical test implemented throughout the eleven chapters of juan no. 50 of the TPJ and designed to sort out things according to their measured efficiency (chapter 3/50/77). This test consists in verifying if the texts do “respond to harmony 相應和”, that is if they successfully produce the intended result, for instance: expelling disasters and having corporeal spirits return to the body; or making people benevolent so that all penal laws and punishments become useless [185.7]. The texts which “respond ten times out of ten 十十相應” constitute the highest of the following ten categories, the lowest corresponding to those which only “hit the mark one time out of ten 十一中者”.

67. This emendation, suggested by the variant from Dunhuang MS S. 4226 (l. 180), matches the actual content of the extant chapter.

68. By analogy with men and ghosts who will respond to the call of their name [184.9-10].

69. We may recall that “divine invocations 神祝” were to be tested in the same way, according to chapter 3/50/75.

70. The TPJ states that from the first category downwards, the texts mislead people and cannot be used: 十十中者以下不可用，詐人文也 [186.1], an obvious textual corruption absent from the TPJC which has: 十七中者以下不可用，詐人文也 (TPJC: 3.17b-18a). The acceptability of the first three categories as opposed to the subsequent seven ones is consistent with the general logic of the tenfold taxonomical principles of the TPJ (see chapter 6/96/152, etc.).

71. This category is also called “half auspicious, half pernicious texts 半吉半凶文 [185.10]. It is to be noted that the subsequent four categories are not said to “respond” (xiàngyín) but only to “hit the mark” (zhòng).
texts to be rejected 素文 no
texts which miss the mark 迭中文 no

The first three categories obviously respond to Heaven (Great Yang), Earth (Great Yin), and Man (Central Harmony) respectively, like categories no. 1, 2, and 3 from the classification expounded in the Yaoxiu keyi jieliü chao (CTT 463, as quoted above). But the general logic of descent, which implacably presides over the present classification from the first down to the tenth category, is not fully operating in the former classification, the logic structure of which (based on two successive triads, then two successive couples of scriptures, as noted above) boils down to a mere enumeration.

Pragmatism also shows through in the fact that not only doxographical sources should be collected, but also practical documents, i.e. what the TPJ variously calls “methods 方” or “schemes 策”. Such practical documents are said to appear spontaneously under propitious circumstances and, just like regular writings, should not be concealed or put to use privately but handed over to the sovereign for the general benefit of the Empire (chapter 4/55/83 etc.). Some of them are bestowed upon men by supernatural beings invoked by specific musical notes.

Chapter 6/88/129 describes the best way to collect locally all such practical material in buildings (zhai 籮) established on the main roads in each administrative district of the Empire, including distant regions in all four directions. Such buildings, especially designed for the purpose of collecting written material, should have notices hung on the outer walls inviting benevolent people to deposit any texts they are in possession of through openings made on their four sides at man’s face level. The name of the contributor should always be mentioned so that those of great merit would be granted official appointments or rewards by local civil servants [332.5-13]. Then all the collected material should be submitted to an editing process similar to the one mentioned above, and finally incorporated into the forthcoming “universal book” (dongji zhi jing) [333.4-9].

The TPJ occasionally deals with documents of the Three Ways (三道), whose “titles” have

72. These two characters, combined with five qualifiers (“marvelous 奇”, “remarkable 殊”, “extraordinary 枚”, “divine 神” and “beneficent 善”), form quasi-synonymous syntags to be found throughout the extant material. The distribution of these syntags is as follows: 奇方 (20 occurrences), 殊方 (18), 枚方 (5), 神方 (5), 善方 (4), 枚方 (4), 枚方 (3), 枚方 (2), 神方 (1), and 善方 (1). It is worth noting that wen 言 also admits these five qualifiers (among several others): 神文 (24 occurrences), 奇文 (12), 善文 (6), 枚文 (3), and 殊文 (2).

73. The two Yang notes of the pentatonic scale: “jade maidens clad in green 青衣玉女” are invoked by the note jue 角, responding to the East, and “jade maidens clad in scarlet 赤衣玉女”, by the note zhi 徵, responding to the South (see chapter 7/113/191). See also Jan, “The Bridge between Man and Cosmos ...”, 18-19.

74. See also Kaltenmark, “The Ideology of the T’ai-p’ing ching”. 28. Kaltenmark does not specify that this particular operation is obviously intended to collect what I call “practical documents” here rather than other kinds of discursive or doxographical documents—the latter being probably best qualified in the TPJ as jing 纂, “scriptures.”
been described by Kaltenmark as “actually the same kind of qualifying terms as *tung-chi ching* [dongji jing 洞極經]”. The informed reader will soon correlate these texts with the general triadic ideology of the TPJ, according to which (chapter 4/53/79) the Three Ways are connected with the Three Luminaries 三明 (i.e. sun, moon, and stars). But the foremost sense of the name of these scriptures is best explained in chapter 6/91/132, which speaks of “memorials compiled and submitted collectively by the Three Ways of low-ranking officers and people 下吏民三道所共集上書文” [360.1]. A more detailed definition of these Three Ways is given in chapter 6/86/127: they refer to local officers (縣官長吏), local residents (居民), and travellers (行者), who are required to “assemble and debate 集議” (another key word in the epistemological program of the TPJ) at the local building formerly described with the aim of submitting memorials (上書) collectively (for, as we have seen earlier, the words of a single individual should never be trusted nor used). Furthermore, the TPJC (6.10a-b) draws a parallel between social and astronomical spheres by stating that the uninterrupted submitting of memorials by these three social groups perpetuates the communication (tong 通) between the people and the Emperor and also ensures the constant circulation (tong) of pneuma necessary to the regular rotation of heavenly bodies around the Pole Star [466.13-467.2]. As we already know that the Chinese of Han times commonly admitted that the political affairs of men were being mirrored in astronomical phenomena, we can easily understand why the TPJC adds that all unnatural phenomena (zaibian 獻變) observed from towns, roads, and the coun-

75. Kaltenmark, “The Ideology of the *T’ai-p’ing ching*”, 26; see also Hachiy, “Taiheiyō ni okeru genji bunsho . . .

50. These documents are variously referred to in nine chapters of the TPJ (no. 3/48/65, 4/53/79, 4/54/81, 6/86/127, 6/91/132, 6/92/136, 6/96/152, 7/108/173, and 7/118/211) and two juan of the TPJC (6.10b, 20a, and 7.42a, 2b) as 三道行書 (11 occurrences) and 三道行文書 (5 occurrences), plus 三道行文, 三道行文書, 三道文書, 三道文, 三道書, 三道通文, and 三道通行八方之書 (1 occurrence each).

77. 天有三文，明為三明，謂日、月、列星也。日以察陽，月以察陰，星以察中央，故當三道行書。 [198.5-6].

78. Obviously, sandao xingshu 三道行書 and its variants (see n. 75 above) are no other than convenient contractions of this phrase.

79. The second “essential instruction” from chapter 7/108/173 (see n. 49 above) tallies with this passage: “Concerning the documents of the Three Ways: get the instructions relating to assembling and debating 其三道行書者，取詫於集議” [510.6].

80. Called here a “house of Great Peace attracting benevolence 太平來善之宅” [328.14].

81. A similar statement appears in the same chapter (共上書言事也，勿得獨有孤一人言也，皆令集議 [318.9-10]), which employs a tenfold classification ranking from “memorials submitted by a single man 一人獨上書” (correlated to “great deception 大欺”) to memorials submitted by “ten men 十人”, where the text is unfortunately incomplete—but memorials submitted by “nine men” are said to be “close to reality” (九人近實) [326.10-327.3].

82. Here the TPJC admits the two variants yimin 色民 (“urban people”) and xingren 行人 (“itinerants”). The various “documents of the Three Ways” are frequently associated with the idea of general circulation (tong) as the following quotations suggest: 書者，但通文書，三道行書也 [152.2] (chapter 3/48/65); 三道通文 [198.5] (chapter 4/53/79); 如是則三道行書已通，無敢聞絕者也 [319.7] (chapter 6/86/127); 三道行文何但使一通集行書而上 [381.10-11] (chapter 6/92/136)—etc.
try, should be recorded in these “documents of the Three Ways” [467.3-4] (TPJC: 6.10b), and why the mistakes (guo 過) of men should also be recorded in them just like spirits in Heaven record men’s mistakes in their own “documents of the Three Ways” (chapter 7/118/211):

So now in Heaven are compiled “documents on the [moral] conduct of the Three Ways” [in which] all the spirits collectively record the mistakes [of men so as] to promote happiness by interrupting the fondness for killing and harming, penal laws, and punishments. It is the same on Earth. [672.9]
故今天下集三道行文書，群神共記過，斷好殺傷刑罰也而興樂。地上亦然。

Pragmatically, all edited documents are required by the TPJ to be disseminated widely for the benefit of everyone under Heaven. The ideal diffusion of this quintessence of knowledge should be vertical (hierarchical), from the sovereign down to the lower strata of society, as well as horizontal (spatial) so as to reach every district of the Empire and even to convert barbarians (yidi 夷狄) in remote areas. It is also of utmost importance that this quintessential knowledge be perpetuated: “transmission” (chuan 傳) is thus another key word of the TPJ, and the presence of disciples by the side of the speaker, as I emphasized earlier, is more than a mere stylistic device. The diffusion of quintessential knowledge ultimately entails its “being put into practice” (xing 行, yong 用, or an yong 案用), otherwise knowledge would remain as useless and inefficient as before. The general rule, repeated restlessly throughout the TPJ, is that all documents, whether revealed by supernatural instances or produced by men of worth—“writings issued by Heaven, symbolic glyphs3 carved by spirits, texts of divine Saints, texts and scriptures authored by Saints, and essays of superior Sages 天之出書，神之出箓符，聖人之文，聖人造文造經，上賢之辭” [692.3] (TPJC: 8.10a-b)—must be submitted to the sovereign, who alone will have the power to guarantee that their import will actually be put to practice at all levels of society. No wonder that the master blames “ignoramuses [who, because they] write their own books and do not put his words into practice, only cause nuisance to themselves 愚者自己寫書，不用其言，但自苦耳” [573.8-9] (chapter 7/112/187). In the views of the authors of the TPJ, ignorance has mostly to do with inefficient theory cut off from the concrete reality.

83. On the nature and function of fu 符 (“symbolic glyphs”) in the context of religious Taoism, see Monika Drexler, Daoistische Schriftmagie: Interpretationen zu den Schriftamuletten Fu im “Daozang” (Stuttgart: Franz Steiner Verlag, 1994): 5-14 (“Teil I: Einführung”); and Catherine Despeux, “Talisman and Sacred Diagrams”, in Daoism Handbook, ed. Livia Kohn (Leiden, Boston, and London: E. J. Brill, 2000), 498-540. The extant TPJ still contains four juan of “doubled characters”, fuwen 複文 or chongfu zi 重符之字 (chapters 7/104/169 to 7/107/172), of which the second half of chapter 6/92/136 explains that such glyphs must be written with ink the color of cinnabar (dan 丹) and ingested (tun 吞) in order to expel disease and demons, etc. A fragment of the TPJC (6.2b-3a) also states that therapeutic “heavenly symbolic glyphs 天符” written in cinnabar are to be ingested and visualized in the stomach. The Dunhuang MS S. 4226 has preserved the following title (which may correspond to this TPJC fragment): “(Chapter) 128: Patterns of the symbolic glyphs of longevity 長寿符圖百予” (l. 281). See also n. 85 and n. 97 below.

26
5. The master’s text or writing as a token of faith

Under the auspices of Heaven itself, writing becomes a token of faith (xin 信), here in epistemological context: writing as a medium for knowledge revealed, then transmitted under special conditions and spread. But epigraphical evidence also shows that the same can be said of ritual communication with supernatural instances (writing as “agreement concluded with deities”) and of everyday life’s social intercourse (writing as “contractual document”). Chapter 3/39/50 glosses “transmission”, one of the keys of the TPJ, as xin (“reliability”, “trustworthiness”): 傳者，信也 [68.13], and chapter 7/112/185 laments the facts that, because of lack of “faith” (xin) in the texts of Heaven, only very few people get to know the truth of the Heavenly Tao and many people neglect revealed documents such as the Hetu and Luoshu. According to chapter 6/96/152, collecting and collating “past and present texts of the Tao” will even make “ignoramuses” become enlightened and “have faith in the Tao” (xin dao). From all this we clearly see that the epistemological issue in the TPJ goes far beyond the single sphere of knowledge. It conditions, within the sphere of religion, the very heart of its psychological basis: belief. Faith, together with filial piety (xiao 孝), uprightness (zhong 忠), sincerity (cheng), and humaneness (ren), becomes one of the moral requisites for social welfare (chapters 7/110/179, 7/111/183, and 7/112/188).

Significantly, in the extant Taiping material, the character xin occurs frequently with the character dao 道 and mostly in association with such expressions as “my writings 與書”, “my text(s) 與文”, and “my words 與言”: for instance, chapter 7/114/197 states that “these writings have no faith in malevolent people, nor do malevolent people have faith in these writings 此書亦不信惡人，惡人亦不信此書” [609.7-8]. The reader wonders, as Kaltenmark wrote, “what is the exact status of the book that the Celestial Master brought to the chen-jen [zhenren 真人], so that they might deliver it to a virtuous prince”. One may be tempted to consider that it is none other

85. On the association of xin (“faithfulness, trustworthiness, or credibility”) with yue 約 (“agreement”, “contract”) and fu 符 (“tally”) which is attested to in both transmitted early imperial sources and Han epigraphic material, see Hugh T. Scogin, Jr., “Between Heaven and Man: Contract and the State in Han Dynasty China”, Southern California Law Review 63.5 (1990): 1378-80 (I quote Scogin’s translations here).

86. 亦皆當拘校古今道文以自相證明，乃愚者一明，悉解信道也。 [412.14-413.1].

87. The disciples of the master (see n. 62 above).

88. Kaltenmark, “The Ideology of the T’ai-p’ing ching”, 25. Kaltenmark added: “I admit that I have not yet been able to solve that question.” (ibid.).
than the *Scripture of Great Peace* itself, but to prove rather than guess, textual evidence is required. Unfortunately, if the text gives several clues to many facets of the master’s writings, it fails to specify clearly what makes them different from other documents set forth throughout the surviving chapters.

In chapter 6/98/159, a question from one of the disciples opens with these words:

In the “original text” of the writings formerly bestowed upon [us], stupid students, by [you], Heavenly Master . . . [448.13]

天師前所賜子愚生書本文…

The idea of a primal literary material (*ben wen* 本文) is here correlated to a document handed down to the disciples by the master. Having frequently warned his disciples against the utterances of individual men, the epistemological program which he expounds throughout his lessons—especially the editing process of quintessential knowledge—enables the master to legitimate his own teaching as a single man: by calling up the talents of all men and the content of all documents of all times to obtain such a total and orthodox knowledge, he may simultaneously, without risking his credibility, promote his own writings. He does so in chapter 3/37/47, entitled “Verifying documents [to achieve] absolute faith” (“*Shi wenshu daxin* 試文書大信”), where he responds to challenges from his disciples concerning the trustfulness of his writings in order to verify that their content is no different from the content of all documents practiced by men of the Three Ages to meet the designs of Heaven. In this manner the unbeliever shall be freed from ignorance and have an absolute faith in the master’s writings.91

We have already seen that the master claims to have been instructed by Heaven; so his writings reveal the “designs of Heaven 天心”, and everyone willing to be acquainted with Heaven is advised to read them thoroughly and meditate on them (see chapters 3/466/62, 4/53/79 etc.). The master also equates his writings with “the language of Heaven and Earth” and claims that they “respond intimately and solely to spirits both heavenly and chthonian like the inside of a garment [corresponds] to the outside” (吾之書即天談地語，與神祇深獨相應若表裡也。 [423.8-9];

89. As commonly admitted by modern Chinese scholars. But none of the associations of writing with the idea of Great Peace in CTT 1101 is clearly connected with the master’s own work, whether in the TPJ proper—“real scripture(s) of Great Peace 太平之真經” [34.7] (chapter 3/35/41), “writings to achieve Great Peace 致太平之書” [41.10] (chapter 3/35/43), “writings of Great Peace 太平之書” [583.1] (chapter 7/112/190) and [624.3] (chapter 7/114/202), and “text(s) of Great Peace 太平文” [683.11] (chapter 7/119/213)—or in the later TPJC—“text(s) (of) the Tao of Great Peace 太平道其文” [697.10] (8.17a), and “Scripture of Great Peace 太平經” [708.12] (9.10a) and [709.5] (9.10b).

90. On this term, see also n. 36 above.

91. Chapter 3/37/47: 子以為吾書不可信也，試取上古人所業行得天心而長吉者書文，復取中古人所業行得天心者書文等，復取下古人所業行得天意而長自企者書文，宜皆上下流視考之，必與重規合矩無殊也，過子蒙且 大解，過後且大信吾書言也。 [56.5-8].

28
their value is thus beyond measure: according to chapter 3/46/62, one thousand (pieces of) gold given to the state do not compare to one essential word from them (故賜國家千金不若與其一要言可以治者也 [112.17-8]). We are even told of their material appearance: they cover (at least) one *juan*\(^2\) (chapter 3/44/60) and their colors are green (*qing* 青), the color of humaneness (*ren* 仁), and red (the text first has *dan* 丹, “cinnabar”, then *chi* 赤, “scarlet”), the color of Great Yang,\(^3\) as well as the “orthodox color of Heaven 天之正色” (TPJC: 4.12a).\(^4\) According to the master, the following simple test of efficiency will prove them to be an “authentic contract 真券”.\(^5\) texts, just like any worldly activity (天下事), should have concrete effects\(^6\) and expel disease in order to be acceptable (see chapter 3/39/51). The master glosses this close correspondence between his writings and universal harmony as “the tally\(^7\) which provokes faith 召信之符” (ibid.). Another practical test, suggested in the TPJC (8.10a), consists in verifying whether the master’s writings, when put to the test of practice, enable one to expel all disasters; if it does, the master will recognize them as his “authentic text” (試使用之，災害悉除，即是吾之真文也 [691.9]). Thus pragmatism again demands that the master’s writings be ultimately put into practice—the final purpose of all valuable knowledge and documents alike. According to the TPJ (chapters 3/50/71, 4/55/83, 4/68/104

92. The expressions *wu shu* 吾書 (“my writings”) and *ci shu yi juan* 此書一卷 (“a single *juan* of these writings”, or “these writings in one *juan*”) occur in the same sentence [109.13-110.2].

93. Further (classical) correspondences for Red/Great Yang are provided in chapter 5/69/105: the quadrate (South), the heavenly body (Sun), the agent (Fire), the season (the midst of summer: 盛夏), the domestic cult (to the spirit of the stove), and the organ (heart) [262.7-9]. The passage adds that the sovereign should be clad in red (衣赤) and that the changing phenomena which affect him “always respond to Yang (i.e. Fire), never to other agents” (故君有變怪，常與陽相應，非得與他行相應也” [262.9-10]. Of course, such passages are clues to the Han ideology (if not date) of the text.

94. According to chapter 5/69/105, Heaven is externally *cang* 苍 (“azure”), the color of agent Wood, but internally scarlet, the color of agent Fire [264.14], and Earth is externally *huang bai* 赫白 (“yellow and white”), the colors of agents Earth and Metal, but internally *hei* 黑 (“black”), color of agent Water [265.3-4]. Zhang Jue 张角, leader of the Yellow turbans 黃巾, who is sometimes believed to have had some of the earliest *taiping* texts after a dubious statement in a commentary to the *Hou Han shu* 封漢書, reportedly prophesied the end of the “azure Heaven 苍天” and the advent of a “yellow Heaven 赫天”—not red (see *Hou Han shu*, 71.2299).

96. 事有成功. We find a similar passage in the TPJC (8.10a): the book of the master conforms to the natural law and, as such, “does not result in fallacious words but produces achievements and concrete effects 不效巧言，乃效成功成事” [691.11].

97. *Fu* 符. When not in the context of symbolic/magical writing or glyphs (see n. 83 above), *fu* designates “tesserae”, i.e. contractual documents divided in two halves and authenticated by adjusting the two halves; see Robert des Rotours, “Les insignes en deux parties (*fou* 符) sous la dynastie T’ang (618-907)”, T’oung Pao 41.1-3 (1952): 1-148; and Scogin, “Between Heaven and Man . . .”, 1379-80. According to chapter 5/72/111, where three similar expressions are to be found (實信之符符 [300.5], 實符符 [300.6], and 信符符 [300.7]), the spirits of the five directions hold distinctive insignia (*jie* 節)—mostly weapons—which are authenticated by “adjusting” (*dui* 對) them to the adept’s (or the emperor’s?)—the text does not state clearly) own insignia and prevent undesirable spirits from appearing and spreading disorder.
etc.), such practice involves carefully reading (jingdu 精讀, xiangdu 詳讀) or reciting (song 誦), and carefully meditating (xiangsi 詳思) in an isolated location (chapter 4/65/101; see also TPJC: 5.11b). Elsewhere we read that the master’s writings go back to the very origin (ben yuan 本元) of all things (chapter 3/49/66), hence their unlimited effectiveness to put an end to chengfu, “inherited burden” (chapters 3/40/52 and 3/42/58), to rectify men as well as documents and bring them back to the true Tao (chapter 3/42/57), to summon Saints, Sages, and Immortals (chapter 3/46/62), to amend all social relationships (chapter 6/96/151), to fully display one’s potential and fulfill one’s mandate here below (TPJC: 5.13b-14b), to restore unaltered longevity, and to dispel the Emperor’s affliction (8.15a), etc.

The TPJC (8.11a-13a) applies to twenty-two categories of cosmic entities (astral bodies, human beings, animals, plants, gods), atmospheric phenomena (clouds, thunder and lightning, wind and rain), cosmological concepts (the Five Agents, Four Seasons, ten stems and twelve branches), and cosmographic features (mountains and hills, water courses and expanses, the underground, etc.) the following sentence: “each [element in a given category, though] different [from its own kind], is endowed with the spontaneous primordial pneuma (yuanqi 元氣) and Yin and Yang, just like my text; [when] each [element] follows its ways, keeps in mind the content of my writings and puts it into practice, then Great Peace [is achieved] 各異，自有自然元氣陰陽，與吾文相似；各從其俗，記吾書解而行之，即太平矣。” [692.8-694.3]. This passage suggests that master’s writings, when properly practiced, hold a universal, therapeutic power to expel any dysfunction from the entire universe and revert to a state of natural equilibrium. So, once successfully tested, the master’s writings should not remain hidden (chapter 6/98/157). Should one of the disciples keep them secret for his private use and fail to produce them on time, Heaven would send him illness and disasters. Disasters and illness also give evidence that the time has come to publish the master’s writings: “If [their] appearing makes people sick, then Heaven wants [them] to be concealed, [but] if hiding [them] makes people sick, then Heaven wants [them] to appear and be circulated 出而病人即天欲

---

98. For instance, each one of the Five Agents (wuxing 五行) is different from the other four, though they all belong to the same category (category no. 16).

99. Chapter 6/102/166: 子為不然，今私匿絕吾文而不以時出之，天即且病子矣子 [462.8-9]. But, in the TPJC (6.18a), the master also urges the disciples “not to transmit rashly 無妄傳” his “documents (?) 吾圖書” but to bury them very deeply in a dark, secluded place (藏之深淵，幽冥之間) and not to talk any more about “essential texts”: 無語要文，外內已悉，無可復言 [403.10-404.2]. Until the proper time for their appearing has come?

100. Tao 遁, literally: “to run away, to escape”, here a synonym for cang 藏: “to bury, to conceal” (both characters are associated as a compound verb in the subsequent sentences of the passage).
On the other hand, according to chapter 6/102/165, “these writings to put an end to vice and falsehood and raise the Tao of Heaven and Earth 此止矣僞與天地道之書” (the master’s writings?) should “be produced on a yisi (no. 42 of the sexagesimal cycle) [day or year?] and be given to messengers who will circulate them 乙已而出，以付郵客而往通之者也” [459.9]. Subsequent generations should then produce again these writings at the beginning of each year and submit them to the Emperor in order to have the concretions of chengfu accumulated since the origin dispelled. It seems uneasy to conform simultaneously to both rules governing the appearance of writings (what if illness spreads when the master’s writings are produced on a yisi day or year?) and, moreover, we are not even sure that both passages actually refer to the same, single work.

The ideal transmission of the master’s writings—from Heaven to the master, then from the master to the disciples—should lead to their passing on by the disciples to “circumspect people 謹 民” who will submit them to a “prince of Tao and Virtue, and of the essence of [agent] Fire 火精道德之君”, who will in turn communicate them to the people (quoting chapter 7/117/207; see also chapters 3/35/41, 5/69/105, 5/70/106, 5/80/121 etc.). Spread and put into practice in the whole empire, the master’s writings should also be brought to neighboring countries so that all the states of the world gradually turn good and come to be free from all disasters (chapter 6/93/139).

All the above information suggests that the unnamed master’s writings themselves show most of (if not all) the characteristics of the various synthetic documents to be edited (the Heavenly scripture, etc.) and thus should be regarded as one of them. However, the following excerpt from chapter 6/96/152 proves that one of the purposes of the master’s writings is to check and correct all the scattered documents in order to extract their quintessential knowledge and have a “universal

101. The striking thematic connection between this passage and a late 6th-century story of the “rediscovery” of the TPJ which stages Tao Hongjing 陶弘景 (456-536) and one of his disciples could support the thesis of the identification of the master’s writings with the TPJ itself. This story, which appears in a fragment of Ma Shu’s 馬儒 (522-581) Daoxue zhuanc 迨學傳 quoted in the late 7th-century Sandong zhunang 三洞珠彌 (CTT 1139.1.17a) and the late 10th-century Taiping yulan 太平御覽 (Beijing: Zhonghua shuju, 1960, 666.4b), tells of an attempt at recovering three lost sections of the TPJ at the beginning of the Liang 梁 dynasty (502-557) by a disciple of Tao Hongjing named Huan Kai 桓閭 (or Huan Fakai 桓法閭; dates unknown), in a desert area close to the Kunlun mountains 昆崙山. The attempt proved unsuccessful due to a sudden disease suffered by Huan Kai after he took possession of the precious scrolls. Tao Hongjing, who authenticated the document, urged Huan Kai to return it to its original location. Huan Kai followed the advice and quickly recovered. Both quotations are translated in Mansvelt Beck, “The Date of the Taiping Jing”, 162-63; and Stephan P. Bumbacher, The Fragments of the “Daoxue zhuanc”: Critical Edition, Translation and Analysis of a Medieval Collection of Daoist Biographies (Frankfurt am Main: Peter Lang, 2000), 270-72 (fragments no. 156 and 157). This story, unattested to in other sources (including hagiographical accounts relating to both Tao and Huan), is in line with the undertaking by the Shangqing school of the reintegration of the TPJ into the corpus of Taoist scriptures—reintegration which also shows through in the preface (xu) to the extant TPJ (see n. 36 above).

102. The TPJC: 8.3b states that the compilation of a dongji jing should coincide with the imminent beginning of a new cosmic “major cycle”: 今地大周更始，災害比（皆）當消亡……故報人珍攜古今文集善者，以為洞極之經，定善不可復易也。 [586.8-9] (I follow the correction suggested by Yu Liming, ed., “Taiping jing” zhengdu, 506). On the identification of the master’s writings with the dongji jing, see below.

103. One more noteworthy clue to the Han ideology of the text.
book” edited—and, if so, the master’s writings can hardly be such a work still to be produced and, at the same time, the tool necessary for the very production of this upcoming work:

So, my writings dare not accept “isolated words and orphan phrases”. This is why I taught [you] Real Men to collect and collate the texts of Upper, Middle and Lower antiquity so that they throw light on each other, and to collect and collate the essays of men here below so that they authenticate each other, after which orthodoxy may be [restored] in the space between Heaven and Earth, and the space between Yin and Yang may be without disease. When [all] past and present “texts of Heaven, divine writings of Earth, and essays of Man” are examined by means of my writings, they will necessarily respond to each other and not be different from spirits, and then one may have faith in my Tao. [421.8-10]

So the master’s writings encompass the scriptural, epistemological sphere in its entirety: vertically, from Heaven down to Earth through the realm of Man; horizontally, right to the farthest marches of the Empire; and temporally, back to the most distant periods of human History—“Akasic records of all that ever anywhere wherever was”.

Concluding remarks

What are these puzzling “master’s writings”? One thinks of the Daode jing 道德經, a work known to have played a central role in religious propagation in the context of early Taoist organizations, or the so-called Apocrypha (weishu), whose relationship with the TPJ has been suggested. But

104. 単言孤辭. This 4-character expression also appears in the table of contents of MS S. 4226, in the title of chapter 6/95/147 (l. 308) which is missing in the ZD edition of the TPJ. It designates the utterances from a single individual as opposed to the collective production of several individuals.

105. Both 天地之間 and 陰陽之間 refer to the world of Man.

106. 天文地神書與人辭 or the general triadic logic of the TPJ applied here to written documents. As previously noted, the syntagm tianwen (“texts of Heaven” in the present translation) also designates astronomical phenomena.

107. Again, the master’s book is said to be associated (he 合) with past and present texts in chapter 6/96/152, but not to be the result of their “collecting and collating” (i.e. editing) process.

any connection is doomed to remain hypothetical, due to the lack of uniformity among the textual layers of the extant material, the absence of textual evidence (such as corroborating mentions or quotations of a named text clearly referred to by an occurrence of “my text” or “my writings”), and the multiplicity of vague deictic syntagms such as ci wen 此文 and ci shu 此書. At least, it seems unquestionable that the document advertised and bestowed upon his disciples by the master cannot be the scripture itself which stages the same master and disciples. Perhaps an earlier or original taiping text such as the unexplained “ben wen”, whether purely mythical or now lost, but at least anterior to the scripture of which the Ming Taoist Canon has preserved about one-third?

The extant taiping material is rich in information relating to the specificity of Chinese epistemology and provides us with a more accurate picture of how religion and politics interacted in early imperial China. The reader witnesses the setting-up by a religious authority of the ideological bases of its future cooperation with imperial power as a candidate for the highly privileged status of official state religion—the Throne giving the Church official sponsorship in response to the Church sanctioning the transcendent legitimacy of the Throne. This prefigures the political successes won by successive Taoist groups soon after the collapse of the Han, despite the contemporary unstoppable progress of the rival religion from India, with which they increasingly had to share the influence on the Throne.

The TPJ suggests that, unlike the many divine documents formerly revealed through supernatural animals coming out of the Yellow and Luo rivers (an obvious allusion to the Hetu and Luoshu, though the master never explicitly questions their revealed nature), the revelation of Great Peace was directly conveyed by Heaven through Man—an entrusted master who speaks in the name of Heaven, and disciples whose questions to the master are also inspired by Heaven (chapter 6/102/165), so that the disciples actually concur with the master in transmitting the Heavenly Word.

From the epistemological point of view, Great Peace can be defined as the diffusion of a “universal book” (dongji jing) of total knowledge consonant with the cosmic principles, to be edited by the intellectual elite of the Empire and approved by the Emperor himself, as expounded by the master under the auspices of Heaven. It is no wonder that knowledge, its nature, and the material condition of its diffusion are among the most obsessive themes of the TPJ.

It is also worth emphasizing that the TPJ marks a decisive turning point in the evolution of the sociopolitical and epistemological functions of the master. The kings of Antiquity, surrounded by various technicians and specialists of more or less esoteric arts, would occasionally seek out re-

111. Chapter 7/112/188: 故弛洞極之經，名曰太平。 [576.3-4]. Kaltenmark, who chose to ignore the first character and to add a word between brackets in his translation in order to make identical the “universal book” (dongji jing) and the TPJ itself, misunderstood the meaning of this sentence. His translation of this sentence occurs in the following context: “One passage, where it is said that ‘the Book of Tung-chi [Dongji 洞極] is called T’ai-p’ing [ching]’ 洞極之經名曰太平, suggests that the true title is T’ai-p’ing ching [Taiping jing] and not Tung-chi ching [Dongji jing 洞極經]” (Kaltenmark, “The Ideology of the T’ai-p’ing ching”, 25).
tired Sages for their advice. But now, the Emperor is in constant need of a heavenly-inspired master, a cosmic tutor who will guarantee an orthodox interpretation of the instructions from above and the conformity of their practice here below. Just as all under Heaven needs a single political ruler, an Emperor of cosmic right, to rule men through a far-reaching bureaucratic apparatus, human knowledge needs an officially sanctioned keeper of the orthodoxy to rule the minds through the apostleship of properly educated disciples. The teaching of the master is acceptable and his writings trustworthy only because both are inspired by Heaven and certified to respond to cosmic principles through the ultimate test of practice. Faith in the Tao pragmatically comes from true knowledge, and true knowledge comes directly from Heaven. Its diffusion throughout society and widespread enactment in practice contribute to universal harmony as reflected in the regular movements of heavenly bodies. Epistemological issues then are inseparable from the heavenly/religious sphere in the TPJ, and what the master lays the foundations of by means of his writings is a new theology—for, as Foucault wrote, “ce que Dieu a déposé dans le monde, ce sont des mots écrits; Adam, lorsqu’il a imposé leurs premiers noms aux bêtes, n’a fait que lire ces marques visibles et silencieuses; la Loi a été confiée à des Tables, non pas à la mémoire des hommes; et la vraie Parole, c’est dans un livre qu’il faut la retrouver”.
