HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Manding Ajami samples: Mandinka and Bamana¹

Valentin Vydrin, INALCO, CNRS-LLACAN

Gérard Dumestre, INALCO, CNRS-LLACAN

1. Introduction

The Manding Ajami writing tradition is much less mysterious today than it was thirty or forty years ago, when scholarly literature would settle for its passing mentions and practically no single authentic text was available. However, the number of texts published still remains extremely low, and they reflect poorly on the geographical spread of this writing system. We are still at the stage where every new text introduced into scholarly circulation is a discovery: with a high degree of probability, it represents either a new variety of the writing, a new literary genre, or even establishes the use in a new geographical area where the existence of Ajami was hitherto unknown. The texts presented here exemplify this situation.

In the following, texts of the manuscripts will be represented in four columns: the source texts in Manding Ajami, i.e. Arabic-based script orthography, a Roman script transliteration, a Roman script standard transcription, and an English translation.

In the transliteration, we tried our best to remain true to the Ajami text. We had to interpret spellings in order to segment texts into words,

¹ The authors would like to thank Charles Riley who volunteered to correct the English texts.

whenever Arabic script (based) graphemes are written disconnected to the left. This applies to the letters 'alif, dāl, ḡāl, rā', zāy, wāw, which are always spelt disconnected to the following letters in Arabic script. Therefore, it is most often impossible to judge whether a word boundary was intended by the author of the manuscript after such a letter or not. In the standard transcription, Bamana text is represented following the official orthography of Bamana language, while dialectal forms are being eliminated². We suppose that they can be easily restored from the transliteration. Although tones are not marked in Arabic based script, lexical tones are marked in the standard transcription, while contextual and grammatical tonal changes (among them, the tonal article³) are ignored.

The Mandinka document is a sample of a magical text. Unlike all the other authentic documents published so far, it is authored, most probably, by an ordinary Muslim, rather than a Muslim cleric, for hunt remains a domain far remote from the sphere of pious Marabouts. 'Allāh and Muḡammad are nevertheless mentioned in these texts, and Arabic words are inserted here and there for possibly extra effectiveness, such as e.g. *tamāli* (3:3, 3:4)⁴, and probably also *qalaqa* (2:2). In essence though, the religious core of this text is quite animist.

² The Ajami writing reflects a dialectal form, different from the Standard Bamana one.

³ In Bamana, a definite article is represented by a floating low tone following a noun or a noun group. In current transcription practice, it is rarely marked even in texts with tonal notation.

⁴ In referencing to the texts, the first number (preceding the colon) represents the number of the text, and the second one (following the colon) represents the line. For the Bamana two-page texts, the figure preceding a slash represents the number of the text, while the second figure (following the slash) represents the page number, and the third figure, following the colon, represents the line.

The other set of texts is the very first sample of the authentic Bamana writing tradition published.⁵ They come from San, an ancient commercial center in the southwestern part of Mali, and might represent the earliest piece ever of authentic Bamana literature.

In the following, the texts are reproduced in digitalized form, provided with an exact Roman script transliteration, a normalized transcription (with tones in Mandinka texts following Creissels et al. 1982), and an English translation including comments. Each text is followed by an analysis of the peculiarities of the Ajami variety.

2. Mandinka hunter's incantations.

The incantations were shown to Valentin Vydrin by Abdulay Daafee, who was his host in the Samakun village (Sédhiou region, Senegal) in October 2007. His oral comments were very helpful in decoding and transliterating of the texts. However, certain passages (given in italics in the Roman transcription) remain obscure, and their respective transliterations and translations therefore remain tentative. In particular, personal pronouns of second singular *í* and third plural *ì* differ only in tone, and the context is usually insufficient to opt for one or the other interpretation. In such cases, decisions were taken more or less at random.

Each incantation begins with an Islamic preamble, followed by magic formulae, which sometimes consist of words which are non-existent in

⁵ The only Bamana texts published so far (Vydrine 1998) were written at the request of Valentin Vydrin. Therefore, they may be considered as evidence for the study of the orthographic tradition of Bamana Ajami, but they do not exemplify its genres.

Mandinka language (at least, they are absent from Mandinka dictionaries and are not recognized by Mandinka speakers as true words). At the end, the objects and substances are mentioned (apparently, those which are necessary for the magic action), followed by the Arabic word اسمه 'ismuhu 'his name'.

كَرَّ بِنَمِ	binamu sulawuli ⁿ	bína mú sùla wùleɲ.	of the mànkara
سَلُّوْلِ			antelope, red monkey.

Comments

Line 1. The first spelling could be read as خَسْبِي | $\langle \text{hsbiy}_1 \rangle$. However, such a reading hardly makes any sense. Most probably, it is an ordinary basmala (بِسْم | $\langle \text{bsm} \rangle$) written in a fanciful way.

Line 2. Apparently سَلَّلِي | $\langle \text{sala'ali} \rangle$ *sala'ali* is a modified form of صَلَّى | $\langle \text{sl}^2\text{y}_1 \text{ l-i} \rangle$ which might be an abbreviated version of the Arabic language formula $\text{صَلَّى اللهُ عَلَيْهِ وَسَلَّمَ}$ | *ṣalla 'Allah 'alayhu wa sallam* 'May God bless him and grant him peace'. In the second and third incantations, it is spelled as سَلَّلِي | $\langle \text{salali} \rangle$.

The word *nari* is absent from all available Mandinka dictionaries. The translation 'stop!' was suggested by Abdulay Daafee.

Line 3. *Koto* may be also interpreted as another word for 'male' (it usually appears in compounds *bàakoto* 'he-goat', *sàakoto* 'ram').

Line 4. *Faakundamaa*, *baakundamaa* are ideophones depicting the antelope's walk.

Lines 5, 6. *jinna* 'bush spirit' is a reading suggested by Abdulay Daafee. The literal reading *díina* 'religion' does not fit the context.

Line 6. *kèèñee* is a word from the respectful vocabulary⁶ for 'to sleep'.

Line 7. The final element of the line is transcribed here as *tata*. In fact, it might be a decorative element indicating the end of the magic formula. Cf. a similar element at the end of the San Bamana text 5.

Lines 8 and 9. It seems to be an enumeration of ingredients for the fabrication of a fetish or amulet. It looks like they were written post

⁶ A special register used for expressing respect. For more information, see Vydrin (2008).

factum, in the blank space, and line 9 was fitted into the left margin of the page.

Line 9. *mànkara* or *mànkari* is an unidentified species of antelope.

Text 2

	Transliteration	Transcription	Translation
سَلَّى مُحَمَّدٍ وَالْعَلَى مُحَمَّدٍ ذِيَابِ جِبِّ قَلَقِ قَلَقِ جِبِّ مِنْ كَيْ كُنْتُ جِبِّ نَتَعَلِ كُدَسِ اسْمَهُ كَسَلِ نَبِّمِ	salali muḥam ² adi wa'la'alij ₁ muḥam ² adi ḡi ⁿ bi ⁿ ḡi ⁿ bi ⁿ ḡi ⁿ bi ⁿ q ₁ alaraq ₁ a q ₁ alaraq ₁ a ḡi ⁿ bi ⁿ mina ⁿ kaya kutu ḡi ⁿ bi ⁿ niti'ala kudasi 'smh kasala ḡa ⁿ bamu	1. Salali Muhammadi ḡalii Muhammadi. Jimbiḡ jimbiḡ. 2. Jimbiḡ kalaka kalaka jimbiḡ. 3. Mìnaḡ kañña kòto jinbiḡ n'í té à lá 4. kùdasi. Ismuhu kásalaa jàmba mú.	1. Greetings to Mohammed and the Highest Mohammed. <i>Jimbiḡ jimbiḡ.</i> 2. <i>Jimbiḡ kalaka kalaka jimbiḡ.</i> 3. Old male antelope, <i>jimbiḡ.</i> If you don't sing this, 4. be puny. Its name is the leaf of the <i>kasalaa</i> grass.

Comments

Lines 1-2. *Jimbiḡ kalaka kalaka jimbiḡ* is a magic formula. There is a Mandinka word *jìmbi* 'a headgear with fringes', but it hardly fits this context. *Kalaka* is not a Mandinka word, but might possibly be related to *qalaaq* 'anxiety, insomnia (Arabic)'.
Line 4. *Kùdasi* is a verb meaning 'to remain underdeveloped', 'to fail to reach normal size' (absent from Creissles et al. 1982).
Kásalaa is an unidentified type of grass, also known as *kàcancároo*.
Abdulay Daafee commented: *Í s'à buru jàḡ* '(After the incantation is pronounced,) you should rub it'.

Text 3

	Transliteration	Transcription	Translation
سَلِّ مُحَمَّدٍ وَالْعَلِيِّ مُحَمَّدٍ دَجِ دَجِ وَرِكَ وَرِكَ كُنْتُ تَمَالِ سَكَّتْ تَمَالِ فَبِ تَمَالِ فَبِ عَبْدًا تَت اسْمِهِ كِسِ مُسْ رَمُ	salali muḥam ² adi wa'la'al ¹ iy muḥam ² adi daḡi ⁿ daḡi ⁿ warika ⁿ warika ⁿ ku ⁿ tu ⁿ tama'li sakata ⁿ tama'li f ₁ abi tama'li f ₁ ubi 'abada ⁿ tt ʔsmih kisi musu ra ⁿ mu	1. Salali Muhammadi wa-l-ḡali: Muhammadi. 2. Dajij dajij warikaṅ warikaṅ kuntuṅ, 3. tamaali sákatuṅ tamaali fàa bìi. 4. Tamaali fó bìi ábadaṅ. 5. Ismihu kèse mósoṛaṅ mú.	1. Greetings to Mohammed and the Highest Mohammed. 2. Cut <i>dajij dajij warikaṅ warikaṅ</i> , 3. always, that is, always, to kill today. 4. Always, up to this day, forever. 5. Its name is a rubber bullet.

Comments

Line 2. *dajij dajij warikaṅ warikaṅ* are magic formulae - These are not Mandinka words.

Lines 3, 4. تَمَالِ | <tama'li> *tamaali* is certainly Arabic *tamalli* 'always' (this word is absent from the everyday Mandinka).

Line 3. سَكَّتْ | <sakatan> *sakatan* was read by Abdulay Daafee as *sókotuṅ* 'that is'. Cf. in Creissels et al. 1982 *sàko*, *sòko* 'surtout, encore plus, à plus fort raison'.

Line 5. *Mósoṛaṅ* is an instrument name from the verb *móso* 'to rub while spitting and pronouncing incantations'. This line denotes the destination of the incantation.

3. Grammatological remarks to the Mandinka hunters' incantations

On the grounds of the spelling of the palatal nasal sonant η^7 , these texts would belong to the main Mandinka Ajami variety (cf. Vydrin, this volume): η < \tilde{n} > is OK represented by ي. Further grammatological characteristics of this document are:

- -s is usually written as *sīn*, except for one case where it is written as *šīn*, i.e. شُبُّ | <šubu> *sùbu* 'animal, meat'.
- -j (a voiced palatal affricate) is spelled as either ج or ج, with the latter appearing both word-initially and word-finally⁸.
- ع is used as support for any diacritic expressing a vowel, when it is not preceded by a consonant. Furthermore, it also is used for spelling of the palatal oral sonant y , although there is only one occurrence in the text, i.e. عَتِّدْ | <'itaⁿdi> *yìtandi* 1:7 'to show'.
- The nasal syllabic phoneme η (which appears in Mandinka in only two words: *ɲ* 'I', *ɲ* 'we') is written as *hamza*, i.e. ʾ (Which could also be an 'ain, i.e. ع) without any support or vocalic diacritics.
- Letters representing emphatics in the orthography of Arabic are not used, with the only exception of the rather obscure word قَلَقَ | <q₁alaq₁a> (2:2).
- *Nūn*, *qāf* and *fā'* are written in the Mağribī way: In word-final positions, *nūn* has normally (with only one exception) no dot, while *qāf* is always spelled with one dot above, i.e. ق, and *fā'* always with one dot below, i.e. ف.

⁷ In the text, there is not a single word containing a p , which makes the other diagnostic criterion (see Vydrin, present volume) inapplicable.

⁸ In one word j is probably written using *dāl*, دِنَا | <dina'> (incantation 1, lines 5 and 6). However, we are not sure about the interpretation of this word.

- Only the three standard vocalic diacritics, i.e. $\bar{\text{a}}$, $\bar{\text{e}}$, and $\bar{\text{i}}$, are used and there are no attempts to differentiate closed and mid vowels.
- 'Alif, wāw, and yā' do not indicate in any way length of vowels. These letters appear mainly at the end of words, sometimes in disagreement with the preceding vocalic diacritic, and always without any visible correlation to vowel length, e.g. بَا *bé* 'imperfective marker'. However, such 'fake length' is much less frequent than in some other Mandinka Ajami texts.
- The syllable-final nasal element is usually rendered by *tanwīn*, e.g. سُلُولِ | <sulwuliⁿ> *sùla wùlen* 'red monkey' (1:9), and rarely by *nūn* as in مَنْ كَر | <man kara> *mànkara* 'species of antelope' (1:9).

4. Bamana texts from San

In 1972, during one of his sojourns in Mali, Gérard Dumestre dispatched a friend of his, Almamy Malik Yattara, to the ancient commercial town of San to look for old Bamana manuscripts. Almamy Yattara was a remarkable representative of the Muslim intelligentsia of Mali, and two books were dedicated to him (Yattara & Salvaing 2000; 2003). Being a Muslim cleric, it was much easier for him than for a white man to gain confidence among his coreligionists. A couple of weeks later, Almamy Yattara returned to Bamako with copies of five manuscripts: Bory Bary, the head of one of the Islamic families of San, allowed him (for a modest recompense) to copy by hand texts, which had originally been written by Bary's father, Amadu Bary, in 1911.

Being literate in French, Almamy Yattara provided each manuscript with a brief comment, which yet proved difficult to understand at times. These comments are reproduced here in an English translation, while the French originals are given in footnotes in the author`s own orthography. There is also a comment written by Almamy Yattara referring to the entire set of the documents:

The length of this sheet is equal to the origin. I have written them from a white paper, the characters are equal.

The gift for these five documents was 6000 Malian Francs, for I gave 3000 Francs for two initial ones, when I saw that I was too tough, and I did it in order to have more, if any. And for the other three manuscripts I gave 3000 Franc. It is the time of working the farm. Nobody has time. By Almamy Yattara.⁹

Today, 39 years after the manuscripts were copied by Almamy Yattara and exactly 100 years after they were created, we proceed to their publication.

Text 1

Almamy Yattara's comment:

⁹ The original text:

Almamy Yattara's comment:

The possessor of the document "cilissi foura" is again Bory Bary. Found in the belongings of his father Amadou Bary, a Muslim cleric. Copied by Almamy Malik Yattara in 1972 in San.¹⁷

ي	y, ɲ; length of i, e, ε	/j/, /ɲ/, /V:/	y
ي	ɲ	/ɲ/	y ₂

¹⁸ In final position.

Comments:

- ح appears only in the name of the Prophet محمد | <mḥmd> Muḥammad.
- ز is used representing *j* only once in an Arabic loan, i.e. زَكَا | <zak'> *jáka* 'alms' (3:5) (from Arabic *zakāt*)
- ص appears only once, in an Arabic loan, i.e. صَلَّى | <ṣalila> *sáli lá* 'with a greeting' (3:1) (from Arabic *ṣalā*).
- ع appears only once (2:15), with its meaning remaining unclear.
- ق (with two upper dots as in Mašriqī) representing *g* occurs only once, i.e. in the word كُنُّنَا | <ku₁qu₁na'> *kóḡora* 'arrived to maturity (perfective form)' (3:15).
- *Nūn* in word-final position appears usually without a dot, i.e. as ن. However, the dotted variant, i.e. ٴن, is also encountered in the texts.
- The usual graphemic representation of *n* as ٴن (with two lower dots and one upper dot) never appears in word-final positions. If a word has *n* in the final syllable, ٴن is always followed by ى. Therefore, it is impossible to figure out which Arabic character served as its base, i.e. ى or ب.
- ي is used representing *n* in only one single case, i.e. سِيَّي | <siyey₁> *sìḡε* 'time' (1/2:6) (which may be a copyist's or author's error).
- ٴي appears in the texts only twice, i.e. in ٴيْمَوْنِي | <y₂umawn⁰y₃y₁> *nùman yé* 'it is good...' (3/1:8), and in ٴيْكُرْنِي | <y₂u₁k₄u₁n⁰y₃y₁> *náḡon yé* 'with each other' (5:15).

- Prenasalization of initial consonants is marked in the same manner as word-internal nasalization by a *nūn* with a *sukūn*, i.e. نْ | <n⁰>, such as in نْكِلِين | <n⁰k₄eleni> *ngèlennin* 'ground squirrel'. Compare also a form كُو | <k₄u₁w> *gò* 'wonderbean (*Canavalia ensiformis*)' (4:4) which is attested in Charles Bailleul's dictionary (2007) as *ngò* (the prenasalization in this word might be absent from the dialect of the manuscript's author).

5.1 Diacritics

Fathā, *kasra*, and *ḍamma* are used for representation of *a*, *i*, and *u* respectively, while *sukūn* represents the lack of any vowel (in fact, it used only with *nūn*).

Tašdīd is rarely employed representing gemination of a nasal sonant as in e.g. كُنْنَا | <ku₁lu₁n²a'> *kòlon ná* 'to the well' (1/2:9) - mostly it is used with unclear purpose, e.g. دِمْسَوُ | <dimis²aw⁰> *dénmisenw* 'children' (1/1:16). Also, it occurs in Arabic loans in order to reproduce the original orthography, e.g. أَلْجَنُّ | <'ʔal⁰ǧan²a> *àlijana* 'Paradise' (3/1:9), جَهَنَّمَ | <ǧah²an²ama>¹⁹ *jàhanama* 'hell' (3/1:9).

In the Bamana Ajami orthography, new diacritics have been introduced for the representation of middle vowels: an 'inversed *ḍamma*', i.e. ُ | <u₁>, representing *o* or *ɔ*, as well as a lower dot, i.e. ̣ | <e>, representing *e* and *ɛ*. There is also a combination of lower dot + *fathā*, i.e. ̣̣ | <ae>, which represents the open front vowel *ɛ*, and which is used only

¹⁹ The *tašdīd* on top of the *hā'* was put here mistakenly by the writer.

in text 4: هَبْرَ | <haera> *héra* 'be in peace' (4:11), ئَ | <yerae> *yèrɛ* 'self' (4:11).

Generally, vocalic diacritics are provided. However, they may be omitted from time to time, apparently due to negligence of the writer or copyist.

Diacritics representing vowels which are not preceded by a consonant are placed on top of a supporting 'alif hamza, i.e. ا | <'?> or ا | <'?i>, such as e.g. in ا | <'?u> *ù* 'they' (1/2:6), ا | <'?e> *é* 'you (singular emphatic)' (1/2:3).

Vocalic nasality is marked either by *mīm* in word-internal position, when the nasal vowel is followed by a labial consonant, or by *nūn* with *sukūn*, i.e. ن | <n⁰>, in all the other contexts, e.g. كَرْتَبَلْ كَلْمَبَا | <karan⁰tela ku₁lu₁m⁰ba'> *Karantɛla kəlɔnba* 'big well of Karantela' (1/1:1), يَنْ | <yan⁰> *yàn* 'here' (1/1:1). Not infrequently, the nasality remains unmarked in word-final positions, such as e.g. دُ | <du₁> versus دُنْ | <du₁n⁰> *dɔn* 'to know' (1/2:1) (both spelling variants appear in the same line), بَابْ | <ba'f₁a> *bá fàn* 'North' (1/2:7), أَبْبِي | <'?a bif₁iyey₁> *à bí fíyen* 'he will become blind' (1/1:6), كِبْ | <kele> *kélen* 4:5 'one'. More rarely, and probably by negligence, it also remains unmarked in word-internal positions, as e.g. in دَنْكُودْ | <den⁰kuwdi> *dénkundi* 'baptism' (1/2:8). When followed by the plural marker -w /ù/, nasality is never marked in the spelling of vowels - e.g. دُكُلُوْ | <duk₄lew⁰> *-dúgulenw* 'natives' (1/2:2), دُنُوْ | <dunaw⁰> *dúnanw* 'strangers' (1/2:1), نِيدُوْ | <nidew⁰> *ní dénw...* 'if children...' (1/2:3).

The syllabic nasal *ń*, which occurs in the first singular pronoun of Bamana is featured in the texts only once, where it is followed by a labial

consonant and expressed by a *mīm* with a *sukūn*, e.g. مُبِيدِل | <m⁰biydeli> *ń* *b'í déli* 'I beg you' (5:10). Supposedly, in all other contexts it is rendered by *nūn* (in the same way as prenasalization and syllable-final nasal).

Vowel length is marked irregularly: بِيَا سُرُ | <beya' su₁ru₁> *b'éε y'à* *sòrɔ* 'all have found it...' (1/1:1), but تَتَبَّطُ | <tiy₃batu> *tìjɛbaatɔ* 'truthful' (3/1:3). On the other hand, letters marking vocalic length in Arabic orthography, i.e. ا , ي , and و , may appear where there is no vocalic length in Bamana: نَانَ | <na'na> *nàna* 'came' (1/1:3), سَمَاسِينُ | <sama'sen₁⁰> *sàmasen* 'buttress' (3/1:3), مِينُ | <miyn₁⁰> *mín* relativization marker (3/1:2).

Quite regularly, vocalic assimilation (usually referred to in the description of Bamana as "elision") is expressed by a letter representing a long vowel in Arabic orthography, particularly when the resulting vowel is a long *aa* or *oo*: أَكْنَآبِي كَا لَجِي | <'ʔu kana' yey₁ ka' laǵey₁> *ù kàn'à* [kànáà] *yé* *k'à* [káà] *lájé* 'they should not see it' (1/1:4), إِبُو تَبِي | <'ʔi bu₁w tu₁bi> *í b'ò* [bóò] *tóbi* 'you will cook it' (4:5). If this assimilation results in an *i*, it is represented as a separate syllable: In such a case, *ii* is written as *kasra* below a supporting 'alif hamza, with an additional *kasra* on the preceding letter, i.e. إِـ | <i 'ʔi>; e.g. كِـ إِسِينُ كُو | <k₂-i 'ʔi sen₁⁰ ku₁w> *k'í sèn kò* 'to wash your feet' (2:6).

Very frequently, word-finally 'length letters' are encountered which do not express any length in Bamana Ajami orthography, as they do in other orthographic traditions, e.g. وَ كُجِي | <wu₁ ku₁f₁ey₁> *wò kɔ fè* 'after that' (1/1:11), سُمَي بِيئِي | <sumay₁ by₃y₁> *sùma bí jè* 'food will be abundant' (1/1:13), سَكُو | <suk₄uw> *súgu* 'sort' (4:4).

The plural marker, /ù/, is rendered by a *wāw* with a *sukūn*, i.e. و | <w⁰> as in e.g. مَا كُرُوْ | <ma' ku₁ru₁w⁰> *màa kòrɔw* /*màa kórúù*/ 'old people' (1/1:3).

The author of the texts makes an effort to maintain the original orthography in Arabic loans, although he does not always succeed, as e.g. in اَلْكَیَوْمَ | <'ʔal⁰kiyaw⁰ma> *àlikiyama* 'Doomsday', which should rather be الْقِيَامَةُ | <'alqiya'mt̄> *al-qiyāma*. In any case, the author writes Arabic loans which have undergone phonological changes following Bamana Ajami orthographic tradition, such as e.g. جَنِي | <ǧiy₃y₁> *jínε* 'world' (cf. Arabic *dunyā*) (3/1:14), هَيْرَ | <haera> *héra* 'be in peace' (cf. Arabic *ḥayra*) (4:11).

5.1 Orthographic segmentation of words

Segmentation of written speech into graphic words in San Bamana Ajami is more or less orderly (especially in comparison with the specimens published in Vydrine 1998). Content words are normally written separately and are fused together only rarely, e.g. as in مَا تَبِنِمَا پِي | <ma' tibenima' yey₁> *Màa tɛ̀ bèn ní màa yé* 'people do not meet each other' (literally 'a man does not meet a man') (1/2:9).

Postpositions are mostly, albeit not always, written together with the preceding word, e.g. اِدِي دُكُلُنِي | <'ʔe de yey₁ duk₄ulen⁰yey₁> *é dè yé dùgulen yé* 'you are the native' (1/2:4), تَلِيبي اَنِكُرُنِي | <tilebif₁ey₁ 'ʔaniku₁ru₁n⁰f₁ey₁> *tilebi fè àní kórɔn fè* 'on the western side and on the eastern side' (1/2:6). Monosyllabic auxiliaries (predictive markers) are usually written together with either the preceding or the subsequent word.

In some instances, derived words are split up orthographically in accordance with their morpheme boundaries, e.g. دُكُّ لَيْلَا | <du₁k₄-u₁ lila'> *dògoli lá* 1/2:9 'secretely'.

5.2 The dialectal characteristics of the texts

The manuscripts are written in a Bamana variety quite close to what is today Standard Bamana, with certain features typical of the eastern dialects, such as the imperfective marker *bí*, as opposed to *bé* in Standard Bamana.

Most often, the lexeme for 'person' appears in its eastern dialectal form, i.e. مَا | <ma'> *màa* (1/1:3,5:5). However, occasionally it may also appear in the western dialectal form, i.e. مُكُّ | <mu₁k₄-u₁> *mògɔ* (5:1). Throughout all the manuscripts, western forms predominate, e.g. تُكُّ | <tu₁k₄-u₁> *tógɔ* 'name' (1/1:8, 3/1:1, 5:3) (cf. the eastern form *twàa*).

Occasionally, intervocalic velars are elided, as for example in سِييِي | <siyy₁> *sìi* 'to sit' (4:7) (cf. Standard Bamana *sìgi*), or نُونَى | <y₃u₁w nay₁> *nón ná* 'to each other' (4:13) (cf. Standard Bamana *nógɔn ná*). Elision of intervocalic velar consonants is typical of Maninka and Mandinka languages spoken in the western part of the Manding area, but also for numerous Manding variants on the southern and eastern periphery of that area.

Also, at times archaic forms are encountered in the texts, such as e.g. كِيَا | <k₄iya'> *gíya* 'to grow clear' (4:8) (cf. Standard Bamana *jé* or *jé-ya*, Proto-Manding *xóyi, and in certain Maninka varieties *gé*).
